Uses Of Values In Legal Education:

Uses of Values in Legal Education Graham Ferris, 2014 Values both constrain and enable behaviour They are a vital source of meaning in human life They may be unconsciously inherited or consciously reflected upon The challenge is to take the greatest advantage of value informed teaching and learning in the context of a pluralist education and society The values legal education imparts or generates impact upon the character of legal professionals The work of jurists impacts upon the quality of public discourse Legal education is under severe threat after a period of tremendous growth across the common law world Legal markets are unstable information technology drives specialisation of labour to new levels rising costs for students and falling returns to the human capital generated by legal education make the prospect of a legal education less enticing Enhanced engagement with values offers the best hope for a positive and coherent response to these pressures by legal educators The Uses of Values in Legal Education makes a start by showing how using values in legal education might fulfil the promise of legal education Incorporation of values into legal teaching and reflection upon values as an integral part of the student learning experience can facilitate the formation of robust and effective individual student identities When this leads to an alignment of student values with life plans it can generate a sense of wholeheartedness in activity that enriches life Students with clear and considered ethical ideas can become effective ethical agents beyond the educational setting This is a must read for anyone designing law curricula He sources his arguments from the fields of literature business economics politics education psychology law and philosophy and he provides both theoretical and practical examples and perspectives This is an important book It is not an easy read the ideas are complex and the range of source material impressive but once the premise is accepted that we have an ethical responsibility to design legal education in the best interests of the law student it is a game changer Rebecca Huxley Binns in *The Law Teacher* 2016 411 Graham Ferris makes a clear and compelling case for why legal education should fully embrace values He explores how values can be incorporated and taught in the law degree curriculum in order to enhance the welfare and capabilities of law students and restores the link between ethical judgment and professional practice His book makes *Innovative Teaching in European Legal Education* Claas Friedrich Germelmann, 2021-04-15 Moderne Lehrmethoden sind in akademischen Diskussionen allgegenwärtig Die Wissenschaft schreitet voran daher muss die Lehre zum Nutzen der Studierenden folgen Auf einer internationalen Konferenz in Hannover Dezember 2019 unter der Gide des renommierten ELPIS Netzwerkes wurde die Angelegenheit anhand der Vielfalt der Rechtsausbildung in den EU Mitgliedstaaten erörtert um gemeinsame Grundlagen für die moderne Rechtslehre zu finden Der vorliegende Band erzielt eine Balance relevanter Erkenntnisse von Wissenschaftlern und Studierenden Er besteht aus Beiträgen von Wissenschaftlern verschiedener Rechtsgebiete an unterschiedlichen Universitäten wie Bernd Oppermann Hannover Claas Friedrich Germelmann Hannover Vasco Pereira da Silva Lissabon Francisco Balaguer Calleja Granada Andreas Schwartze Innsbruck Arndt Knecke Berlin Maria Meng Papantoni Athen Patrick R Hugg New Orleans Rui Guerra

Law as Civic Education Ariel Liberman,2025-06-27 If a civic education is the essential foundation for a functioning discursive democracy how should it be taught This book offers an innovative solution arguing that far from abandoning the often grand promise of civic education as a means of cultivating reasoning skills and democratic character we should embrace it and proposes a reimagined civic education based on teaching students in primary and secondary school law and legal reasoning Drawing on a range of theoretical disciplines law philosophy ethics sociology psychology and moral educational and child development theory this monograph justifies the benefits of law learning as a form of character and civic education and offers historical and comparative educational examples to show what is possible It demonstrates how legal teaching can be incorporated into a K 12 curriculum and argues that such training can be transformative guiding students to become citizens capable of meeting the demands of democracy citizens with stronger reasoning skills a motivation to self examine their values and beliefs and bring them into conversation with social values and an ability to effectively navigate political institutions and participate in public discourse This compelling and deeply original work will be of interest to scholars and educators in the fields of civic education character and virtue education legal studies and philosophy of education

The Ethics Project in Legal Education Michael Robertson,Lillian Corbin,Kieran Tranter,Francesca Bartlett,2010-10-06 The contributions in this volume suggest that the ethics project in legal education is increasingly an international one Even though the strength of commitment by both the profession and the legal academy to ethics learning within law schools varies two fundamental questions confront all who work in this area First what is it that we want our students to learn or perhaps in what manner do we want our students to develop from the teaching of legal ethics Second how can we create a learning environment that will encourage the nature and quality of learning we think is important All the contributors to this volume take a strong stand on the importance of ethical legal practice and the role of law schools in developing students capacities in this area They share a belief in the essential need to encourage law students to engage with the moral dimensions of legal practice The questions that these scholars grapple with are therefore not of the should we be teaching this variety but how might we best to go about doing this so that our efforts within law schools really make some difference Each of the chapters in this volume adds uniquely to our understanding of these matters

Harding, Jiaxiang Hu, Maartje de Visser, 2017-11-20 Legal education systems like legal systems themselves were framed across Asia without exception according to foreign models These reflect the vestiges of colonialism and can be said to amount to imitating the style and purposes of legal education typical in Western and relatively pure common law and civilian systems Today however we see Asian legal education coming into its own and beginning to accept responsibility for designing curricula and approaches that fit the region's particular needs This book explores how conventional transplanted approaches as regards program design as well as modes of teaching are or are on the cusp of being reimagined and discerns emerging home grown traces of innovation replacing imitation in countries and universities across East Asia *Legal Education in the Global Context* Christopher Gane, Robin Hui Huang, 2017-05-15 This book discusses the opportunities and challenges facing legal education in the era of globalization It identifies the knowledge and skills that law students will require in order to prepare for the practice of tomorrow and explores pedagogical shifts legal education needs to make inside and outside of the classroom With contributions from leading experts on legal education from various jurisdictions across the globe the work combines theoretical depth with practical insights Seeking to understand the changing landscape of legal education in the era of globalization the contributions find that law schools can and must adopt educational strategies that at least present students with different understandings of what studying and practicing law is meant to be about They find that law schools need to offer their students choices a vision of practice that is not driven entirely by the demands of the marketplace or the needs of major international law firms Bridging the gap between theory and practice this book makes a significant contribution to the impact of globalization on legal education and how students and law schools need to adapt for the future It will be of great interest to academics and students of comparative legal studies and legal education as well as policy makers and practitioners Legal Aid and the Future of Access to Justice Catrina Denvir, Jacqueline Kinghan, Jessica Mant, Daniel Newman, 2023-07-27 This open access book provides a snapshot of the state of contemporary access to justice in England and Wales Legal aid lawyers provide a critical function in supporting individuals to address a range of problems These are problems that commonly intersect with issues of social justice including crime homelessness domestic violence family breakdown and educational exclusion However the past few decades have seen a clear retreat from the tenets of the welfare state including as part of this the reduced availability of legal aid This book examines the impact of austerity and related policies on those at the coalface of the legal profession It documents the current state of the sector as well as the

social and economic factors that make working in the legal aid profession more challenging than ever before Through data collected via the Legal Aid Census 2021 the book is underpinned by the accounts of over 1000 current and former legal aid lawyers These accounts offer a detailed demography and insight into the financial cultural and other pressures forcing lawyers to give up publicly funded work This book combines a mixture of quantitative and qualitative analysis allowing readers a broad appreciation of trends in the legal aid profession This book will equip readers with a thorough knowledge of legal aid lawyers in England and Wales and aims to stimulate debate as to the fate of access to justice and legal aid in the future The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on bloomsburycollections.com
