

## Dichotomous Keys

Classification is the science of dividing organisms into groups and sub-groups based on how they are related. A tool called a dichotomous key is an organized list of characteristics that can be used to identify organisms. The identified organisms can then be placed into their correct classifications. In this lab activity, you will use dichotomous keys to identify various plants and animals.

### MATERIALS:

Metric ruler

### PART 1: PINE TREES

Use a metric ruler and the following dichotomous key to correctly identify 5 species of pine trees based on their needles. (Note: Measure from the base to the tip of each bundle.)

1. A. Needles come in groups of two ..... Go to step 2  
 B. Needles come in groups larger than two ..... Go to step 3
2. A. Needles are less than 3 cm. long ..... Jack pine  
 B. Needles are longer than 3 cm. .... Go to step 4
3. A. Needles come in groups of three ..... Pitch pine

**Fungi of North America** Michael Beug, Alan E. Bessette, Arleen R. Bessette, 2014-03-01 Approximately 75 percent of all fungi that have been described to date belong to the phylum Ascomycota They are usually referred to as Ascomycetes and are commonly found and collected by mushroom enthusiasts Ascomycetes exhibit a remarkable range of biodiversity are beautiful and visually complex and some including morels and truffles are highly prized for their edibility Many play significant roles in plant ecology because of the mycorrhizal associations that they form Thus it is remarkable that no book dedicated to describing and illustrating the North American Ascomycetes has been published in over sixty years Filling the gap between technical publications and the limited representation of Ascomycetes in general mushroom field guides *Ascomycete Fungi of North America* is a scientifically accurate work dedicated to this significant group of fungi Because it is impossible to describe and illustrate the tens of thousands of species that occur in North America the authors focus on species found in the continental United States and Canada that are large enough to be readily noticeable to mycologists naturalists photographers and mushroom hunters They provide 843 color photographs and more than 600 described species many of which are illustrated in color for the first time While emphasizing macroscopic field identification characteristics for a general audience the authors also include microscopic and other advanced information useful to students and professional mycologists In addition a color key to the species described in this book offers a visual guide to assist in the identification process

*Tests that Second Language Teachers Make and Use* Greta Gorsuch, 2019-10-24 Classroom tests are an everyday feature of second and foreign language classrooms worldwide Teachers spend a lot of time and energy making and using tests and learners spend a lot of time and energy taking them Nonetheless such assessments are under studied as they are considered routine This volume illuminates this little researched area Featuring fifteen classroom language tests made and used by Chinese English French German Italian Japanese Russian and Spanish teachers the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers processes of making and using their tests Rather than view teachers tests as poor shadows of what professional test writers do this work identifies the reasoning behind teachers tests In addition focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary This book is an accessible applied resource for second and foreign language teachers language program administrators working with teachers students in teacher preparation and enrichment programs and
