*Corrupted* Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities. He reveals the political economy at work and the intense competition for resources on campuses. He also provides interventions for these fragile institutions. Why do some universities seem to be in a constant state of turmoil and dysfunction? Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities. Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials, Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources, especially on campuses located in impoverished communities. It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never-ending run on the material, such as money for infrastructure and symbolic, namely graduation certificates for sale. Assets of these institutions, Jansen argues, that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities, such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions. This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly.

Public Intellectuals in South Africa Chris Broodryk, 2021-07-01 This edited collection gives voice to neglected public intellectuals in the arts, humanities, and journalism in South Africa who gave voice and presence to those who have been marginalized and silenced in South African history. Edward Said described a public intellectual as someone who uses accessible language to address a designated public on matters of social and political significance. The essays in *Public Intellectuals in South Africa* apply this interpretive prism and activist principle to a South African context and tell the stories of well-known figures as well as some that have been mostly forgotten. They include Magesa Fuze, John Dube, Aggrey Klaaste, Mewa Ramgobin, and Koos Roets alongside marginalized figures such as Elijah Makiwane, Mandisi Sindo, William Pretorius, and Dr Thomas Duncan Greenlees. The essays capture the thoughts and opinions of these historical figures who the contributors argue are public intellectuals who spoke out against the corruption of power, promoted a progressive politics that challenged the colonial project and its legacies, and encouraged a sustained dissent of the political status quo. Offering fascinating accounts of the life and work of these writers, critics, and activists across a range of historical contexts and disciplines from journalism and arts criticism to history and politics, it enriches the historical record of South African public intellectual life. This volume makes a significant contribution to ongoing debates about the value of research in the arts and humanities and what constitutes public intellectualism in South Africa.

This open access book is interdisciplinary and provides cross sectoral and multi dimensional exploration of sustainable development and transportation in South Africa. Drawing on work from different disciplines, the book contributes not only to academia but also seeks to inform urban and regional policy with the view of contributing to the national aspirations of South Africa as espoused in the National Development Plan (NDP) 2030, National Spatial Development Framework (NSDF) Draft 2019, National Climate Change Adaptation Strategy (NCASS) Draft 2019, Green Transport Strategy for South Africa 2018-2050 and National Transportation Plan (NATMAP) 2050. Adopting a multi dimensional assessment, the book provides a background for co production concerning climate change, sustainable development and transportation in the Global South. The book contributes in its analysis of the institutional and legislative framework that relates to the climate change skills and knowledge transfer, sustainable development and transportation in South Africa as these are responsible for the evolution of the green economy and transport sector in the country. The connections among different sectors and issues such as environment, transport modes, technology, innovation, vehicle management and emission control, skills and knowledge transfer, legislative and policy framework and the wider objectives of the sustainable development goals (SDGs) especially goals 11 to 13. The success stories relating to climate change, sustainable development and transportation in South Africa are identified together with the best possible practices that may inform better environmental, urban and regional planning, policy, practice and management. **Critical Perspectives on Work-Integrated Learning in Higher Education Institutions** Nirmala Dorasamy, Renitha Rampersad, 2018-11-30. Governments around the world are committed to enhancing students' graduateness. Work integrated learning (WIL) is one of the many programmes which Higher Education Institutions (HEIs) can develop to promote this facet of student life. The incorporation of work integrated learning in curriculum design and development can produce reciprocal benefits for students, workplaces, professions and communities. Any curriculum design and development endeavour relating to WIL requires appropriate resources to support curriculum development. This book serves to explore WIL programmes and experiences for the student, WIL coordinator and supervisor. It further integrates practical, relevant and reflective industry experience within the higher education curriculum to enhance student development. WIL has no uniform or specific framework or approaches since it is an emerging field and is generally influenced by contextual factors. In view of the diversity in theory and practice and different purposes, whether pragmatic or practical, driving the adoption of one approach over another, this book highlights the diverse approaches that encapsulate WIL in South Africa. Freshwater Challenges of South Africa and its Upper Vaal

It highlights the major problems and risks which need to be addressed and give a realistic and true representation of the current water affairs. **Indigenous Supply Chain Management in Africa** Temidayo O.

Akenroye, Marcia Mkansi, Godfrey Mugurusi, Aaron L. Nsakanda, 2025-09-26 This edited work assembles knowledge on wide-ranging indigenous supply chain management (SCM) theories and practices from different African countries, particularly sub-Saharan Africa. The chapters concentrate on how African culture influences supply chain practices, nature, operations, structures, outcomes, and value propositions. This is essential knowledge to facilitate a better understanding of what SCM might mean in the African context while also serving as an avenue to evaluate similarities and differences between cross-country management theories. Africans have historically employed indigenous SCM to address the socioeconomic challenges they face in the coordination of the movement of goods, services, and all processes that transform raw materials into finished goods. By identifying and examining the differences, similarities, and complementarities between various African indigenous SCM concepts and ideologies, this work will inform the development of new models and interventions in response to Africa's complex business management challenges. It will forge new ground for researchers and policymakers regarding effective, efficient, and sustainable solutions to manage global supply chain challenges. *Increasing Resilience to Climate Variability*

*and Change* Cecilia Tortajada, 2016-08-18 This book highlights the role that both infrastructure and governance play in the context of resilience and adaptation to climate variability and change. Eleven case studies analyze in depth impacts of extreme events in projects, basins, and regions in the Arid Americas, United States, and Mexico, Australia, Brazil, China, Egypt, France, Nepal, Mexico, Pakistan, Turkey, and South Africa. They discuss the importance of infrastructure, mainly reservoirs, in adaptation strategies, how planning and management aspects should improve in response to changing climatic, economic, social, and environmental situations, and what the management, institutional, and financial challenges would be for their implementation. Governance aspects, policies, institutions, and decision-making, and technical and knowledge limitations are a substantial part of the analyses. The case studies argue that reservoirs are essential to build resilience contributing to adaptation to climate variability and change. However, for them to be effective, they need to be planned and managed within a governance framework that considers long-term perspectives and multi-sector and multi-level actor needs and perspectives. **Rock | Water | Life** Lesley Green, 2020-03-20 In *Rock Water Life*, Lesley Green examines the interwoven realities of inequality, racism, colonialism, and environmental destruction in South Africa, calling for environmental research and governance to transition to an ecopolitical approach that could address South Africa's history of racial oppression and environmental exploitation. Green analyzes conflicting accounts of nature in environmental sciences that claim neutrality.
