Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Understanding the Volatile and Dangerous Middle East Steven Carol, 2019-09-26 The Middle East can be bewildering, which is why we need to connect the dots that pull together the political, economic, diplomatic, military, cultural and religious pieces of the puzzle. Professor Steven Carol slashes through the confusion with a topical approach focusing on key issues such as the geographic features of the Middle East, demographics of the region, the influence of Islam, political processes, shifting alliances, war in the region and the need for security. He also takes a careful look at perpetual negotiations, attempts to secure peace and the role that the media play in how we view the region. His goal is to clarify the confusing nature of Middle East affairs and to combat the mistaken beliefs, misrepresentations and outright fabrications about the region. In a bid to reclaim the truth, he shares basic principles relying on factual supporting evidence to prove their validity. Seventy-eight maps and numerous tables make understanding complex topics easier. Whether you're a student, educator, bureaucrat or politician, you'll find insights based on facts in *Understanding the Volatile and Dangerous Middle East*.

Metrics Vincanne Adams, 2016-03-05 This volume's contributors evaluate the accomplishments, limits and consequences of using quantitative metrics in global health. Whether analyzing maternal mortality rates, the relationships between political goals and metrics, data or the links between health outcomes and a program's fiscal support, the contributors question the ability of metrics to solve global health problems. They capture a moment when global health scholars and practitioners must evaluate the potential effectiveness and pitfalls of different metrics, even as they remain elusive and problematic. Contributors: Vincanne Adams, Susan Erikson, Molly Hales, Pierre Minn, Adeola Oni, Orisan Carolyn Smith, Morris Marlee, Tichenor Lily, Walkover Claire L. Wendland.

In This Together Marianne E. Krasny, 2023-03-15 *In This Together* explores how we can harness our social networks to make a real impact fighting the climate crisis. Against notions of the lone environmental crusader, Marianne E. Krasny shows us the power of network climate action: the idea that our own ordinary acts can influence and inspire those close to us. Through this spread of climate-conscious practices, our individual actions become collective ones that can eventually effect widespread change. Weaving examples of everyday climate-forward initiatives in with insights on behavioral and structural change, Krasny demonstrates how we can scale up the impact of our efforts through leveraging our community connections. Whether by inviting family, friends or colleagues to a plant-rich meal or by becoming activists at climate nonprofits, we can forge the social norms and shared identities that can lead to change. With easy-to-follow dos and don'ts, *In*
