Vancouver Light, 2014 Setting out to photograph Vancouver is a daunting challenge for any photographer even one as accomplished as David Nunuk Its world renowned viewsapes have been recorded so many times by so many great artists in film and paint that some avoid the challenge by seeking out side streets and producing works in a minor key But Nunuk faces the Vancouver challenge head on In Vancouver Light his bold plan was to revisit all the classic Vancouver views the ever changing downtown core the eternally graceful Lions Gate Bridge the scintillating waters of English Bay the snow clad barrier of the North Shore mountains and capture their magnificence more completely than anyone has ever done before As this breathtaking collection shows he has brilliantly succeeded and reaffirms his city s reputation as one of the most stunningly beautiful urban centres on earth As readers turn pages showing the cityscape mirrored in the still water of Coal Harbour a dusting of cherry blossoms bestowing their grace on a line of parked cars and a North Shore panorama glowing as if fashioned from molten gold they can only gaze in wonder and ask How on earth did he get that It helps that Vancouver is Nunuk s hometown and he has the privilege of studying its changing face through every season and mood patiently stalking the moment when light and colour juxtapose perfectly The book is a treasury of visual epiphanies that every Vancouverite will want to keep as a reminder of why they live there and everyone else will want to compensate for the fact they don t Printed in an oversize 11 14 format on deluxe coated stock Vancouver Light contains over 100 full colour gallery quality images spanning the Greater Vancouver region from Howe Sound to the Fraser River Truly it may be said Vancouver s contrasts and beauty have inspired many photo collections but none like Nunuk s

governments to agree on how to reduce greenhouse gas emissions and manage the average temperature rise to within 1.5 degrees. In *Solved* David Miller argues that cities are taking action on climate change because they can and because they must. The updated paperback edition of *Solved: How the World's Great Cities Are Fixing the Climate Crisis* demonstrates that the initiatives cities have taken to control the climate crisis can make a real difference in reducing global emissions if implemented worldwide. By chronicling the stories of how cities have taken action to meet and exceed emissions targets laid out in the Paris Agreement, Miller empowers readers to fix the climate crisis. As much a how-to guide for policymakers as a work for concerned citizens, *Solved* aims to inspire hope through its clear and factual analysis of what can be done now today to mitigate our harmful emissions and pave the way to a 1.5 degree world. **Food City** CJ Lim, 2014-04-16. In *Food City*, a companion piece to *Smartcities* and *Eco Warriors*, innovative architect and urban designer CJ Lim explores the issue of urban transformation and how the creation, storage, and distribution of food has been and can again become a construct for the practice of everyday life. *Food City* investigates the reinstatement of food at the core of national and local governance, how it can be a driver to restructure employment, education, transport, tax, health, culture, communities, and the justice system, re-evaluating how the city functions as a spatial and political entity. Global in scope, *Food City* first addresses the frameworks of over 25 international cities through the medium of food and how the city is governed. It then provides a case study through drawings, models, and text, exploring how a secondary infrastructure could function as a living environmental and food system operating as a sustainable stratum over the city of London. This case study raises serious questions about the priorities of our governing bodies, using architectural relationships to reframe the spaces of food consumption and production, analyzed through historical precedent, function, and form. This study of the integration of food architecture and the development of future cities will both inspire and stimulate professionals and students in the fields of urban design and architecture.
