**Handbook of Mineral Surface Mining and Exploration** Richard Hoppe, 1978 For several decades to come surface mining will continue to play a major role as the main source of much of the world's mineral wealth. Billions of tons of metallic ores, fertilizers and associated waste products are mined from surface deposits each year around the world. This handbook was organized to provide the reader engaged in the search, design and operation of such surface mines with current useful information of practical application. The articles were gleaned and edited from recent issues of *Engineering and Mining Journal*. Foreword

, 1970 NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database which began in 1970. NSA existed as a printed product. Volumes 1-33 initially created by DOE's predecessor the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.
