The Living Elements of Healthy Building Design Janus Welton Aia Bbei Architect, 2007-06-14. Based on 15 years of wide-ranging study, *THE LIVING ELEMENTS OF HEALTHY BUILDING DESIGN* is the first in a series of guidebooks that accompany workshops of the same name to educate and clarify the impact of current building practices and materials on the indoor environment and human health in a form accessible to laypersons and professionals alike, from homeowner to non-technical designer. To simplify and substantiate this wealth of information, the author organizes the material through the lens of the Living Elements: Earth, Metal, Water, Wood, Air, and Fire, emphasizing the interrelationship between human life, the earth, and the cosmos. This reference and its companion volumes, soon to be published, support the concept of Conscious Architecture, an innovative and integrated model of architecture and design that inspires harmonious structures where natural elements purposefully intermingle with form, color, light, and sound to create holistic and healthy buildings that contain and reflect the wholeness of nature and its expression in the human spirit.

Religion, Heritage and the Sustainable City Yamini Narayanan, 2014-10-10. The speed and scale of urbanisation in India is unprecedented almost anywhere in the world and has tremendous global implications. The religious influence on the urban experience has resonances for all aspects of urban sustainability in India, and yet it remains a blind spot while articulating sustainable urban policy. This book explores the historical and ongoing influence of religion on urban planning, design, space utilisation, urban identities, and communities. It argues that the conceptual and empirical approaches to planning sustainable cities in India need to be developed out of analytical concepts that define local sense of place and identity. Examining how Hindu religious heritage, beliefs, and religiously influenced planning practices have impacted sustainable urbanisation development in Jaipur and Indian cities in general, the book identifies the challenges and opportunities that ritualistic and belief resources pose for sustainability. It focuses on three key aspects: spatial segregation and ghettoisation, gender-inclusive urban

development and the nexus between religion nature and urban development This cutting edge book is one of the first case studies linking Hindu religion heritage urban development women and the environment in a way that responds to the realities of Indian cities It opens up discussion on the nexus of religion and development drawing out insightful policy implications for the sustainable urban planning of many cities in India and elsewhere in South Asia and the developing world
