Zimsec 2geography Paper :

Introduction to Zimbabwe Gilad James, PhD, Zimbabwe is a landlocked country in southern Africa bordered by South Africa to the south Botswana to the west Zambia to the north and Mozambique to the east The country has a population of approximately 14.4 million people with the majority living in rural areas Zimbabwe gained its independence from British colonial rule in 1980 and has been governed by the Zimbabwe African National Union Patriotic Front ZANU PF since then Zimbabwe's economy has faced many challenges in recent years including hyperinflation a shortage of foreign currency and political instability Agriculture is the largest sector of the economy with the majority of the population engaged in subsistence farming The country is also rich in minerals such as gold platinum and diamonds Despite its economic struggles Zimbabwe remains a popular tourist destination known for its wildlife natural beauty and historical landmarks such as Great Zimbabwe a 15th century stone city that is now a UNESCO World Heritage site *Geographical Journal of Zimbabwe*, 1990

Education and Development in Zimbabwe Edward Shizha, Michael T. Kariwo, 2012-01-01 The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe It challenges scholars to think about the role of education its funding and the egalitarian approach to widening access to education The nexus between education democracy and policy change is a complex one The book provides an illuminating account of the constantly evolving notions of national identity language and citizenship from the Zimbabwean experience The book discusses educational successes and challenges by examining the ideological effects of social political and economic considerations on Zimbabwe's colonial and postcolonial education Currently literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe This book is likely to be one of the first on the impact of social political and economic meltdown on education The book is targeted at local and international academics and scholars of history of education and comparative education scholars of international education and development undergraduate and graduate students and professors who are interested in educational development in Africa particularly Zimbabwe Notwithstanding the book is a valuable resource to policy makers educational administrators and researchers and the wider community Shizha and Kariwo's book is an important and illuminating addition on the effects of social political and economic trajectories on education and development in Zimbabwe It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture The book offers new insights that may be useful for an understanding of not only the Zimbabwean case but also education in other African countries Rosemary Gordon Senior Lecturer in Educational Foundations University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist universal elementary education to the disarray of contemporary socioeconomic crisis covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local

deprofessionalization of teaching this text provides a comprehensive wide ranging and yet carefully detailed account of education in Zimbabwe This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe s education specifically but more widely to all who are interested in how the sociopolitical shapes education how ideology policy international pressures economic factors and shifts in values collectively forge the historical and contemporary character of a country s education Handel Kashope Wright Professor of Education University of British Columbia

Zimbabwe@40 Lloyd Sachikonye,David Kaulemu,2021-05-17 Zimbabwe 40 is a celebration of the country s four decades of independence and statehood Forty years is a relatively short period in a nation s life but it is a formative period what lessons can be learnt from the successes and failures challenges and opportunities of the last 40 years What should be avoided in the next 40 Lloyd Sachikonye and David Kaulemu have assembled a distinguished team of scholars to address these questions and the book focuses on issues that characterise the country s development trajectory the linkage between values and institutions defects in its democracy the curse of mineral and agricultural endowment the impact of migration and the social exclusion of women and young people The book is written from a depth of commitment to a just peaceful and prosperous Zimbabwe and represents a work in progress reflecting the continuing research evaluation and dialogue that each of the authors is engaged in and signalling the nature and direction of future such work As the editors conclude None of the chapters are pessimistic nor are they negative about the country They are realistic about the gravity of the historical moment the nation faces and the high moral political and economic mountains we must climb before we can see the Promised Land Yet they are full of hope they are convinced that we have not come to the end of history Outcomes of post-2000 Fast Track Land Reform in Zimbabwe Lionel Cliffe,Jocelyn Alexander,Ben Cousins,Rudo Gaidzanwa,2014-06-11 The struggle over land has been the central issue in Zimbabwe ever since white settlers began to carve out large farms over a century ago Their monopolisation of the better watered half of the land was the focus of the African war of liberation war and was partially modified following Independence in 1980 A dramatic further episode in this history was launched at the start of the last decade with the occupation of many farms by groups of African veterans of the liberation struggle and their supporters which was then institutionalised by legislation to take over most of the large commercial farms for sub division Sustained fieldwork over the intervening years by teams of scholars and experts and by individual researchers is now generating an array of evidence based findings of the outcomes how land was acquired and disposed of how it has been used how far new farmers have carved out new livelihoods and viable new communities the major political and economic problems they and other stakeholders such as former farm workers commercial farmers and the overall rural society now face This book will be an essential starting place for analysts policy makers historians and activists seeking to understand what has happened and to spotlight the key issues for the next decade This book was published as a special issue of the Journal of Peasant Studies
