Zimbabwe: The Link Between Politics and the Economy Godfrey Kanyenze, 2022-03-31 In this accessible and authoritative book, Godfrey Kanyenze provides a comprehensive and far-reaching analysis of the socio-economic development in Zimbabwe in light of the expanding authoritarianism and the ongoing destruction of democratic institutions during the four decades after independence. Kanyenze describes the various phases of the socio-economic development starting with 1980 when the people of Zimbabwe saw their hard-won independence and new democracy as a promise for a better life for all. Kanyenze highlights how, by dismantling all barriers of economic and legal restraint and that despite being necessary, the land reform programme put the political and financial interests of the elite before those of the people, which continues to this day. Kanyenze reveals the governmental attacks on civil society and notes how economic policy was not even part of an authoritarian bargain, an implicit arrangement between ruling elites and citizens whereby citizens relinquish political freedom in exchange for public goods. And he concludes this analysis with a current update of Zimbabwe today where citizens have nothing, neither political freedom nor public goods. This impressive and gripping account of an authoritarian capitalist system and a country in decline is a must-read for students, researchers, policymakers and those who want to better understand how politics and the economy, interests, conflicts and power work together.

Financial Inclusion Regulatory Practices in SADC Howard Chitimira, Tapiwa

Warikandwa,2023-05-25 Against a background of calls to prioritise the improvement of financial inclusion in Africa this book provides an analysis of current financial inclusion measures in Southern Africa Evaluating the existing strengths and weaknesses of financial inclusion in Africa it identifies opportunities to improve inclusive financial services and aid poverty reduction in the region With a focus on South Africa Namibia Botswana and Zimbabwe as case studies for assessing current financial inclusion in the context of particular challenges faced by unbanked and underbanked customers who are easy targets for cybercriminals due to low levels of digital literacy it looks into the regulation and promotion of financial inclusion in Southern Africa The book explores financial inclusion in the context of digital transformation in the 21st century examining the regulation and promotion of financial inclusion in the context of digital transformation as well as the challenges related to financial inclusion Suggesting improvements to aspects of company law securities and financial markets in the Southern African Development Community region the book offers a comprehensive study on the regulation and promotion of financial inclusion in the Southern African Development Community region It will be essential reading for students and academics researching financial inclusion international economic law and development *The Misery of International Law* John Linarelli,Margot E. Salomon,M. Sornarajah,2018 Poverty inequality and dispossession accompany economic globalization Bringing together three international law scholars this book addresses how international law and its regimes of trade investment finance as well as human rights are implicated in the construction of misery and how international law is producing reproducing and embedding injustice and narrowing the alternatives that might really serve humanity Adopting a pluralist approach the authors confront the unconscionable dimensions of the global economic order the false premises upon which they are built and the role of international law in constituting and sustaining them Combining insights from radical critiques political philosophy history and critical development studies the book explores the pathologies at work in international economic law today International law must abide by the requirements of justice if it is to make a call for compliance with it but this work claims it drastically fails to do so In a legal order structured around neoliberal ideologies rather than principles of justice every state can and does grab what it can in the economic sphere on the basis of power and interest legally so and under colour of law This book examines how international law on trade and foreign investment and the law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others It studies how a set of principles in the form of a New International Economic Order NIEO that could have laid the groundwork for a more inclusive international law without even disrupting its market orientation were nonetheless undermined As for international human rights law it is under the terms of global capitalism that human rights operate Before we can understand how human rights can create more just societies we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration that will continue to create the need for human rights protection This book challenges conventional justifications of economic globalization and eschews false choices It is not about whether one is

for or against international trade foreign investment or global finance The issue is to resolve how if we are to engage in trade investment and finance we do so in a manner that is accountable to persons whose lives are affected by international law The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law and not merely as a discrete benevolent response to it
