A Manual for Government Accounting United Nations. Department of Economic and Social Affairs,1970 The Complete Reference Guide to United Nations Sales Publications, 1946-1978 Mary Eva Birchfield,2019-05-20 No detailed description available for The Complete Reference Guide to United Nations Sales Publications 1946 1978 **Public Expenditure and**

Indian Development Policy 1960-1970 J. F. J. Toye,1981 Of the many different ways in which economists have tried to analyse public expenditure the most relevant to Indian economic development is that which links the level of public expenditure with the rate at which the state can accumulate capital The abstract theory of this link however must be complemented by a historical account of the degree to which a state accumulation policy was understood by Indian policy makers and of the other often inconsistent elements in the economic strategy of Indian nationalism After attempting to provide accounts both of the abstract theory and of the institutional and policy context within which it was applied this book analyses original empirical data on public expenditure in India between 1960 and 1970 The real growth rate of public expenditure its functional and economic composition at the all India level are presented and the strong contrast between the patterns of the first and last five year periods is elucidated The effect of the 1965 67 droughts and bad harvests in producing this contrast is assessed **The United Nations in Global Tax Coordination** Nikki J. A New Architecture for the U.S. National Accounts Dale W. Jorgenson, J. Steven Landefeld, William D. Nordhaus, 2007-11-01 A New Architecture for the U S National Accounts brings together a distinguished group of contributors to initiate the development of a comprehensive and fully integrated set of United States national accounts The purpose of the new architecture is not only to integrate the existing systems of accounts but also to identify gaps and inconsistencies and expand and incorporate systems of nonmarket accounts with the core system Since the United States economy accounts for almost thirty percent of the world economy it is not surprising that accounting for this huge and diverse set of economic activities requires a decentralized statistical system This volume outlines the major assignments among institutions that include the Bureau of Economic Analysis the Bureau of Labor Statistics the Department of Labor the Census Bureau and the Governors of the Federal Reserve System An important part of the motivation for the new architecture is to integrate the different components and make them consistent This volume is the first step toward achieving that goal
