A Framework for Assessing Effects of the Food System National Research Council, Institute of Medicine, Board on Agriculture and Natural Resources, Food and Nutrition Board, Committee on a Framework for Assessing the Health, Environmental, and Social Effects of the Food System, 2015-06-17 How we produce and consume food has a bigger impact on Americans well being than any other human activity The food industry is the largest sector of our economy food touches everything from our health to the environment climate change economic inequality and the federal budget From the earliest developments of agriculture a major goal has been to attain sufficient foods that provide the energy and the nutrients needed for a healthy active life Over time food production processing marketing and consumption have evolved and become highly complex The challenges of improving the food system in the 21st century will require systemic approaches that take full account of social economic ecological and evolutionary factors Policy or business interventions involving a segment of the food system often have consequences beyond the original issue the intervention was meant to address A Framework for Assessing Effects of the Food System develops an analytical framework for assessing effects associated with the ways in which food is grown processed distributed marketed retailed and consumed in the United States The framework will allow users to recognize effects across the full food system consider all domains and dimensions of effects account for systems dynamics and complexities and choose appropriate methods for analysis This report provides example applications of the framework based on complex questions that are currently under debate consumption of a healthy and safe diet food security animal welfare and preserving the environment and its resources A Framework for Assessing Effects of the Food System describes the U S food system and provides a brief history of its evolution into the current system This report identifies some of the real and potential implications of the current system in terms of its health environmental and socioeconomic effects along with a sense for the complexities of the system potential metrics and some of the data needs that are required to assess the effects The overview of the food system and the framework described in this report will be an essential resource for decision makers researchers and others to examine the possible impacts of alternative policies or agricultural or food processing practices

Achieving Food Security in China Zhang-Yue Zhou, 2017-05-18 China s food security has never failed to attract the public s attention Feeding China s large population has always been a huge challenge The latest large scale famine took place in 1958-62 during which approximately 37 million people died of starvation However since the early 1980s China s food availability has improved drastically The important question is then has China achieved its food security Although China s food availability has significantly improved it has not achieved a high level of food security due to the lack of progress in several other important dimensions of food security The book examines China s food security practices in the past six decades explores the root causes that led to food shortages or abundances and elaborates on the challenges that China has to deal with in order to improve its future food security China s quest for food security serves as a valuable lesson

for many other countries to learn through China's experiences and to better manage their food security in the future. The book also draws attention to the fact that China's food security status has a huge impact on the global community and hence global collaboration is a mutually beneficial approach. *Human Rights Of, By, and For the People* Keri Iyall Smith, Louis Edgar Esparza, Judith Blau, 2017-02-03 Together the US Constitution and the Bill of Rights comprise the constitutional foundation of the United States. These the oldest governing documents still in use in the world urgently need an update just as the constitutions of other countries have been updated and revised. *Human Rights Of By and For the People* brings together lawyers and sociologists to show how globalization and climate change offer an opportunity to revisit the founding documents. Each proposes specific changes that would more closely align US law with international law. The chapters also illustrate how constitutions are embedded in society and shaped by culture. The constitution itself sets up contentious relationships among the three branches of government and between the federal government and each state government while the Bill of Rights and subsequent amendments begrudgingly recognize the civil and political rights of citizens. These rights are described by legal scholars as negative rights specifically as freedoms from infringements rather than as positive rights that affirm personhood and human dignity. The contributors to this volume offer positive rights instead. The Universal Declaration of Human Rights UDHR written in the middle of the last century inspires these updates. Nearly every other constitution in the world has adopted language from the UDHR. The contributors use intersectionality critical race theory and contemporary critiques of runaway economic inequality to ground their interventions in sociological argument. The Undergraduate Experience Peter Felten, John N. Gardner, Charles C. Schroeder, Leo M. Lambert, Betsy O. Barefoot, Freeman A. Hrabowski, 2016-04-22 A clear practical framework for getting higher education back on track. *The Undergraduate Experience* is a guide for significantly improving student learning and institutional performance in the rapidly changing world of higher education. Written by recognized experts in undergraduate education this book encourages college and university leaders to rethink current practices that fragment the student experience and to focus on creating powerful integrated undergraduate learning for all students. Drawing from their own deep experience and the latest research the authors reveal key principles that enable institutional change and enhance student outcomes in any higher education setting. Coverage includes high impact practices for engagement the importance of strategic leadership the necessity of setting and maintaining high expectations and insight on fostering excellence through systematic planning. Through its core themes and action principles this book can be a valuable resource for faculty staff administrators and governing boards at all types of postsecondary institutions. The book provides a practical framework for achieving excellence in undergraduate education by focusing on Learning Relationships Expectations Alignment Improvement Leadership. The value of an undergraduate education is under greater scrutiny than ever before and campus leaders must be able to convey the value of their institutions to students boards donors and legislators. Is a college or university degree worth the increasing cost? Are today's

students academically adrift What s the difference between a degree and an education Responding to these questions requires focused action by individuals and institutions The Undergraduate Experience offers practical guidance for creating and sustaining excellence in the face of disruption and change in higher education Krause's Food & the Nutrition Care Process, Iranian edition E-Book L. The Eurasian Wheat Belt and Food Security Sergio Gomez y Paloma, Sébastien Mary, Stephen Langrell, Pavel Ciaian, 2016-10-11 This book provides an in depth analysis of the wheat production developments in the Eurasian region and assesses the potential contribution of the region to domestic and international food security In particular the book covers policy and institutional developments of the agricultural sector in Eurasia with a special focus on the horizontal issues relevant to the current and future potential growth of the wheat production such as land policy credit and finance privatization farm restructuring and environmental challenges Global food security is a major societal concern in the light of an increasing population which is projected to grow from around seven billion today to almost 10 billion in 2050 Two most likely ways to achieve the much needed food production growth are expansion of land cultivation or increase in crop yields and total factor productivity The only region with a significant amount of uncultivated arable land that is at the same time experiencing rising agricultural productivity is the Eurasian wheat belt comprising of Russia Ukraine Kazakhstan and the Central Asian countries Uzbekistan Tajikistan Turkmenistan and Kirgizstan This makes the region a potential hotspot for driving the future growth of global agriculture Such prospects require a detailed investigation of Eurasia s future perspectives in terms of food production with a focus on wheat and its potential contribution to regional and global food security

Civic Engagement in Food System Governance Alan R. Hunt, 2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences

Food as a Mechanism of Control and Resistance in Jails and Prisons Salvador Jiménez Murguía, 2018-02-19 Murguía explores food and foodways within institutions of incarceration Food like all resources within total institutions is vulnerable to social manipulation Within jail and prison settings food becomes both a mechanism of control and resistance In the former the type of food its quality its quantity and the symbolic significance of its presence or absence all contribute to the socio political experience of the incarcerated perhaps even adding an extra form of punishment to one s sentence not measured in time but rather in terms of cruelty In the latter the incarcerated may view the preparation of food the innovation it may undergo its consumption or even the refusal of its consumption along these same socio political lines Thus viewing food within jail and prison as social facts that engender real consequences reveals a virtually uncharted area of research for understanding the intersection between food and life within the confines of incarceration Of this line of inquiry Murguía asks how food is employed as a means to control prisoners and conversely how do prisoners employ food in the service of resistance As his analysis suggests this text emphasizes a need to advance a broader discussion about the diets of prisoners
