Magidimisha-Chipungu, Lovemore Chipungu, 2021-09-28 This book s point of departure rests on the premises that dimensions of the mainstream inclusive city discourse fail to capture in detail vulnerable clusters of society being women children and the aging the minority clusters i e the blind the disabled and migrants In addition it fails to recognize the increase of spatial inequality driven by racial and class differences a factor that has seen an increase in community violence and protests The focus on spatial inequality has for a long time blind folded urban authorities to ignore exclusion arising out of the same environments created with a notion of creating inclusivity Hence this book collapses spatial walls as it seeks to uncover the true perspectives of inclusivity in cities beyond spatial dimensions but within social realms The depth of this book s enquiry

rests on its critical investigation of Southern African cities through historical epochs of apartheid and colonialism in the region *Extractive Industries and Changing State Dynamics in Africa* Jon Schubert,Ulf Engel,Elisio Macamo,2018-07-04 This book uses extractive industry projects in Africa to explore how political authority and the nation state are reconfigured at the intersection of national political contestations and global transnational capital Instead of focusing on technological zones and the new social assemblages at the actual sites of construction or mineral extraction the authors use extractive industry projects as a topical lens to investigate contemporary processes of state making at the state corporation nexus Throughout the book the authors seek to understand how public political actors and private actors of liberal capitalism negotiate and redefine notions and practices of sovereignty by setting legal regulatory and fiscal standards Rather than looking at resource governance from a normative perspective the authors look at how these negotiations are shaped by and reshape the self conception of various national and transnational actors and how these jointly redefine the role of the state in managing these processes for the greater good *Extractive Industries and Changing State Dynamics in Africa* will be useful for researchers upper level students and policy makers who are interested in new articulations of state making and politics in Africa **The Geography of South Africa** Jasper Knight,Christian M. Pedagogies Belinda Mendelowitz, Ana Ferreira, Kerry Dixon, 2022-12-15 Winner of the UKLA Academic Book Award 2024 This book challenges monoglossic ideologies traditional language pedagogies and dominant forms of knowledge construction by foregrounding multilingual and multicultural students language narratives repertoires and identities The research is based on a sixteen year longitudinal study of a sociolinguistics course at an English language university and the language narratives produced by the first year education students The study was borne out of a need to create a critically inclusive course that would engage a cohort of students from socially and linguistically diverse backgrounds in contemporary South Africa Drawing on data from over 5 000 students who have journeyed through this course this book shows how a narrative heteroglossic pedagogy harnesses students multilingual strengths A close analysis reveals complex identity work by students located in the Global South The authors argue that decolonising language education is about reconceptualising language reconfiguring what knowledges are valued in the classroom and reshaping pedagogy *The ^Astruggle for Freedom from Fear* Alison Brysk, 2018-08-01 How can we understand and contest the global wave of violence against women In this book Alison Brysk shows that gender violence across countries tends to change as countries develop and liberalize but not in the ways that we might predict She shows how liberalizing authoritarian countries and transitional democracies may experience more shifting patterns and greater levels of violence than less developed and democratic countries due to changes and uncertainties in economic and political structures While a combination of international action law public policy civil society mobilization and changes in social values work to decrease gender violence Brysk assesses the potential limits and balance of these measures *ICEL 2018 13th International Conference on e-Learning* Professor Eunice Ivala, 2018-07-05

Africa's Soft Power Oluwaseun Tella, 2021-05-23 This book investigates the ways in which soft power is used by African countries to help drive global influence. Selecting four of the countries most associated with soft power across the continent, this book delves into the currencies of soft power across the region from South Africa's progressive constitution and expanding multinational corporations to Nigeria's Nollywood film industry and Technical Aid Corps TAC scheme; Kenya's sport diplomacy, fashion and tourism industries; and finally Egypt's Pan-Arabism and its reputation as the cradle of civilisation. The book asks how soft power is wielded by these countries and what constraints and contradictions they encounter. Understandings of soft power have typically been driven by Western scholars but throughout this book Oluwaseun Tella aims to Africanise our understanding of soft power drawing on prominent African philosophies including Nigeria's Omoluwabi, South Africa's Ubuntu, Kenya's Harambee and Egypt's Pharaonism. This book will be of interest to researchers from across political science, international relations, cultural studies, foreign policy and African Studies. Torpor and Hibernation:

Metabolic and Physiological Paradigms Sylvain Giroud, Robert Henning, Yoshifumi Yamaguchi, Jérémy Terrien, 2024-06-21 Torpor or heterothermy corresponds to a state of depressed metabolism and is associated with specific metabolic, cellular and molecular adaptations that often occur on a seasonal basis. Yet the exact mechanisms and functioning of these changes are poorly understood. Interestingly, the potential of such extraordinary animal adaptation for human and animal health as well as other biomedical considerations has raised particular attention especially in the last decade. The strong metabolic and physiological adaptations of heterotherms can be of particular inspiration for current biomedical and pathological situations e.g. obesity and related diseases, cardiovascular and metabolic dysfunctions, ischemia reperfusion injuries, immune depression and for the health and longevity of animal species including humans.

Politics at a Distance from the State Lucien van der Walt, Kirk Helliker, 2022-08-23 For decades most anti-capitalist and anti-imperialist movements identified radical transformation with capturing state power. The collapse of these statist projects from the 1970s led to a global crisis of left

and working class politics But crisis has also opened space for rediscovering alternative society centered anti capitalist modes of bottom up change operating at a distance from the state These have registered important successes in practice such as the Zapatistas in Mexico and Rojava in Syria They have been a key influence on movements from Occupy in United States to the landless in Latin America to anti austerity struggles in Europe and Asia to urban movements in Africa Their lineages include anarchism syndicalism autonomist Marxism philosophers like Alain Badiou and radical popular praxis This path breaking volume recovers this understanding of social transformation long side lined but now resurgent like a seed in the soil that keeps breaking through and growing It provides case studies with reference to South Africa and Zimbabwe and includes a dossier of key texts from a century of anarchists syndicalists insurgent unionists and anti apartheid activists in South Africa Originating in an African summit of radical academics struggle veterans and social movements the book includes a preface from John Holloway
