Dependency and Social Inequality in Pre-Roman Italy Martin Bentz, Patrick Zeidler, 2024-10-21 In the past most studies on Pre Roman societies in Italy 1st millennium BCE focused on the elites their representation and cultural contacts The aim of this volume is to look at dependent and marginalized social groups which are less visible and often even difficult to define slaves servants freedmen captives foreigners athletes women children etc The methodological challenges connected to the study of such heterogeneous and scattered sources are addressed Is the evidence representative enough for defining different forms of dependencies Can we rely on written and pictorial sources or do they only reflect Greek and Roman views and iconographic conventions Which social groups can't be traced in the literary and archaeological record For the investigation of this topic we combined historical and epigraphical studies Greek and Roman literary sources Etruscan inscriptions with material culture studies images sanctuaries necropoleis including anthropological and bioarchaeological methods These new insights open a new chapter in the study of dependency and social inequality in the societies of Pre Roman Italy *New Approaches to the Study of Esotericism*, 2020-12-15 This volume offers new approaches to some of the biggest persistent challenges in the study of esotericism and beyond Commonly understood as a particularly Western undertaking consisting of religious philosophical and ritual traditions that go back to Mediterranean antiquity this book argues for a global approach that significantly expands the scope of esotericism and highlights its relevance for broader theoretical and methodological debates in the humanities and social sciences The contributors offer critical interventions on aspects related to colonialism race gender and sexuality economy and marginality Equipped with a substantial introduction and conclusion the book offers textbook style discussions of the state of research and makes concrete proposals for how

esotericism can be rethought through broader engagement with neighboring fields

Roosevelt elk populate the parks along California's north coast and comprise the largest land mammals in the parks some weighing up to 1 200 pounds They are a stable terrestrial land mammal population a fixture in the parks but still require ongoing stewardship and management In a study spanning more than twenty years Weckerly made key observations and conducted various investigations under a multitude of ecological conditions Few authors have dedicated this much time and effort into a single research area It is a testament to perseverance that his groundbreaking study of the Roosevelt elk was so successful He was able to document the independent dynamics of several herds of female elk experience the extinction of one of their subpopulations and record scientific conclusions in the context of resiliency and redundancy of the elk population This book will be of considerable interest to those who investigate the ecology of big game animals including naturalists hunters and individuals with particular interest in Redwood State and National Parks It is an important book that contributes substantially to the persistence and viability of Roosevelt elk in the parks and the surrounding area

Smilodon Lars Werdelin, H. G. McDonald, Christopher A. Shaw, 2018-05-15 The consummate guide to the ultimate sabertooth Few animals spark the imagination as much as the sabertooth cat Smilodon With their incredibly long canines which hung like fangs past their jaws these ferocious predators were first encountered by humans when our species entered the Americas We can only imagine what ice age humans felt when they were confronted by a wild cat larger than a Siberian tiger Because Smilodon skeletons are perennial favorites with museum visitors researchers have devoted themselves to learning as much as possible about the lives of these massive cats This volume edited by celebrated academics brings together a team of experts to provide a comprehensive and contemporary view of all that is known about Smilodon The result is a detailed scientific work that will be invaluable to paleontologists mammalogists and serious amateur sabertooth devotees The book covers all major aspects of the animal's natural history evolution phylogenetic relationships anatomy biomechanics and ecology traces all three Smilodon species across both North and South America brings together original unpublished research with historical accounts of Smilodon's discovery in nineteenth century Brazil The definitive reference on these iconic Pleistocene mammals Smilodon will be cited by researchers for decades to come Contributors John P Babiarez Wendy J Binder Charles S Churcher Larisa R G DeSantis Robert S Feranec Therese Flink James L Knight Margaret E Lewis Larry D Martin H Gregory McDonald Julie A Meachen William C H Parr Ashley R Reynolds Kevin L Seymour Christopher A Shaw C S Ware Lars Werdelin H Todd Wheeler Stephen Wroe M Aleksander Wysocki

Ferroptosis: Intersections, Implications, and Innovations in Programmed Cell Death Patrice X. Petit, Bilal Çiğ, Juan Carlos Mayo, 2025-08-08 Ferroptosis a form of regulated cell death driven by iron dependent lipid peroxidation has emerged as a critical mechanism governing a myriad of pathophysiological conditions Firstly identified in cancer cells the process of ferroptosis has since been implicated in various disease states including neurodegeneration kidney damage cutaneous and cardiovascular diseases The identification and understanding of ferroptosis have revolutionized our perception of cell death and survival unraveling new potential therapeutic targets and strategies Yet

despite the progress made crucial gaps in our knowledge persist How exactly does ferroptosis intersect with other types of cell death What are the specific markers and effectors of ferroptosis in different cell types How can we precisely manipulate ferroptosis in cellular models and what anticipations can we build from such experiments regarding possible therapeutics This Research Topic aims to collect the latest advances in our understanding of ferroptosis and seeks to increase our knowledge of the cellular and molecular machinery behind this form of programmed cell death It will probe into the links between ferroptosis and other forms of cell death its regulation and manipulation for potential therapeutic advantage as well as its role in various pathophysiological conditions **The People and the State** P.A.J.
