Entrepreneurial Universities Marta Peris-Ortiz, Jaime Alonso Gómez, José M. Merigó-Lindahl, Carlos Rueda-Armengot, 2016-12-13 This book analyses the importance of the entrepreneurial university specifically in relation to the creation of entrepreneurial ideas and attitudes in students and entrepreneurial initiatives in academic institutions The aim of the editors and contributing authors is to provide the reader with a set of experiences illustrating the advantages of communicating and encouraging entrepreneurship among students thereby highlighting the third mission of the university the need to adopt entrepreneurial strategy without disrupting the quality of teaching and research Featuring initiatives from

institutions around the world the authors argue that the increasing importance of knowledge in the technical and social dimensions of today's world provides greater relevance to the entrepreneurial university. In this context universities transcend their traditional focus on teaching and basic research to carry out technology transfers, marketing ideas and patent registrations and incorporate spin off companies that contribute to industrial innovations, economic growth and job creation. In the teaching dimension the entrepreneurial university represents a focus on programs which train students in the applications and most advanced practices in knowledge driven fields. The book addresses such questions as: Can marketing ideas deteriorate the quality of research in the long term? What importance does the cultural framework have for an entrepreneurial education? What circumstances and programs facilitate spin offs in universities? What are the key features of entrepreneurial universities? In reference to entrepreneurship education in its broadest sense then it corresponds to the framework of ideas and general features on which entrepreneurship is founded in depth knowledge of the projects or ventures which they wish to carry out, capacity to perceive the relevant characteristics of the environment and the leadership and goal setting skills to achieve success.

The author demonstrates that although the term open data seems to be self explanatory it involves an evolving ecosystem of complex domains. Through empirical case studies this book explains how governments in the ASEAN may harvest the benefits of open data to maximize their productivity, efficiency and innovation. The book also investigates how increasing digital divides in the population, boundaries to civil society and shortfalls in civil and political rights threaten to arrest open data in early development which may hamper post 2015 development agendas in the region.
