**Institutionalisation of Evaluation in the Americas** Reinhard Stockmann,Wolfgang Meyer,Laszlo Szentmarjay,2022-02-03 This book examines the progress of institutionalisation of evaluation in American countries from various perspectives It presents prior developments and current states of evaluation in 11 American countries and three transnational organisations focusing on three dimensions namely the political social and professional systems These detailed country reports which have been written by selected researchers and authors of the respective countries lead to a concluding comparison and synthesis This is the second of four volumes of the compendium *The Institutionalisation of Evaluation* The first volume on Europe was published in 2020 It will be followed by two more volumes on Asia Pacific and Africa The overall aim is to provide an interdisciplinary audience with cross country learning to enable them to better understand the institutionalisation of evaluation in different nations world regions and sectors **Gorilla Pathology and Health** John E Cooper,Gordon

Hull,2016-12-21 Gorilla Pathology and Health With a Catalogue of Preserved Materials consists of two cross referenced parts The first the book itself is a review of pathological changes and tissue responses in gorillas Gorilla gorilla and G beringei with an emphasis on free living animals but also with reference to those in captivity The comparative aspects are discussed stressing the relevance of research to both gorillas and humans What makes the publication truly unique however is the second part a comprehensive descriptive catalogue of the location and nature of gorilla material in museums and scientific institutions throughout the world This is of great consequence because free living gorillas are strictly conserved with restricted access so the location of a wealth of preserved tissues and other material that has been collected over the decades is a great benefit for research and study This book can and should be used to gain cardinal knowledge regarding the biology and pathology of this genus The combination of book and catalogue in this extensive compilation makes it an invaluable tool for all those concerned with the health welfare and conservation of gorillas one of our nearest living relatives Brings together studies data and clinical practice from difficult to access or obscure journals and NGO reports in different languages for all interested parties and practitioners Provides perspectives on existing research in gorilla pathology both for those studying conservation practices and those seeking an understanding of comparable diseases in humans Includes illustrative figures on gross and microscopic pathological changes museum specimens photos of field necropsy and techniques and examples of laboratory tests Features an extensive list of references and further reading in different languages Incorporates a comprehensive descriptive catalogue of gorilla material from around the world

**A multi-billion-dollar opportunity - Repurposing agricultural support to transform food systems** Food and Agriculture Organization of the United Nations,United Nations Development Programme,United Nations Environment Programme,2021-09-14 Public support mechanisms for agriculture in many cases hinder the transformation towards healthier more sustainable equitable and efficient food systems thus actively steering us away from meeting the Sustainable Development Goals and targets of the Paris Agreement This report sets out the compelling case for repurposing harmful agricultural producer support to reverse this situation by optimizing the use of scarce public resources strengthening economic recovery from the COVID 19 pandemic and ultimately driving a food systems transformation that can support global sustainable development commitments The report provides policymakers with an updated estimate of past and current agricultural producer support for 88 countries projected up until 2030 The trends emerging from the analysis are a clear call for action at country regional and global levels to phase out the most distortive environmentally and socially harmful support such as price incentives and coupled subsidies and redirecting it towards investments in public goods and services for agriculture such as research and development and infrastructure as well as decoupled fiscal subsidies Overall the analysis highlights that while removing and or reducing harmful agricultural support is necessary repurposing initiatives that include measures to minimize policy trade offs will be needed to ensure a beneficial outcome overall The report confirms that while a few countries have started

repurposing and reforming agricultural support broader deeper and faster reforms are needed for food systems transformation Thus it provides guidance in six steps on how governments can repurpose agricultural producer support and the reforms this will take      In Search of Meadowlarks John M. review of Sri Lanka's education sector from early childhood education through higher education. With this book they attempt to answer three questions: How is Sri Lanka's education system performing especially with respect to participation rates, learning outcomes and labor market outcomes? How can the country address the challenges at each stage of the education process taking into account both country and international experience and also best practices? Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.
