Uon 2016 2017 Regular Intake:

African Constructions of China Kwaku Opoku Dankwah, 2023-12-12 Marking a constructivist turn in Africa China scholarship this book explores African constructions of China Using Ghana and Kenya as case studies the book outlines the role of diverse state and non state actors in defining what China represents to the region and how it compares to Western powers Resisting Sino and state centric analysis of China Africa relations this book emphasises the importance of African agency in shaping the discourse The book demonstrates that the identity construction of a foreign state such as China takes place both at the international level and at a domestic intrastate level Domestic constructions of China in Ghana and Kenya reflect internal tensions about future directions for African political and socioeconomic development and these constructions in turn help to justify government policies towards China The book concludes by questioning the idea of a straightforward win win relationship and suggests that exploitative hierarchical relations conventionally associated with North South interactions may continue in South South relations This book s important analysis of the role of domestic non state actors in shaping African policymaking extends much needed nuance to a sometimes polarised debate It will be of interest to researchers across the fields of politics international relations global development and African and Chinese Studies
