Storage™ SAN Volume Controller which is powered by IBM Spectrum Virtualize V8.3.1 IBM SAN Volume Controller is a
virtualization appliance solution that maps virtualized volumes that are visible to hosts and applications to physical volumes
on storage devices Each server within the storage area network SAN has its own set of virtual storage addresses that are
mapped to physical addresses If the physical addresses change the server continues running by using the same virtual
addresses that it had before Therefore volumes or storage can be added or moved while the server is still running The IBM
virtualization technology improves the management of information at the block level in a network which enables applications
and servers to share storage devices on a network **Indiana Drivers' Manual** ,1998 Fossil Energy Update ,1984
