Human Development Report 2005 United Nations Development Programme, 2005 The Human Development Report 2005 examines the scale of the challenge facing the world at the start of the ten year countdown to the 2015 Millennium Development Goals mark The Report focuses on three pillars of cooperation each of which is in urgent need of renovation The first pillar is international aid the Millennium Development Goals MDGs project has been compromised by chronic and sustained under financing allied to problems in aid quality The second pillar is international trade Under the right conditions trade can act as a powerful catalyst for human development The development round of World Trade Organization talks launched in 2001 provided northern governments with an opportunity to create those conditions The third pillar is that of security violent conflict is a source of systematic human rights violation and a barrier to progress towards the MDGs that must be overcome

The New Regionalism in Africa Fredrik Söderbaum, 2017-03-02 This edited volume transcends conventional state centric and formalistic notions of regionalism and theorizes conceptualizes and analyzes the complexities and contradictions of regionalization processes in contemporary Africa The collection not only unpacks and theorizes the African state society complex with regard to new regionalism but also explicitly integrates the often neglected discourse of human security and human development In so doing the book moves the discussion of new regionalism forward at the same time as it adds important insights to security and development It is organized into three parts Part I theorizes conceptualizes and analyzes the new regionalism in Africa from the point of view of the region e g West East Central and Southern Africa The national perspectives in Part II focus on the new regionalism in Africa from the point of view of particular countries or specific state society complexes such as Kenya the Democratic Republic of the Congo DRC the enclave of Cabinda Angola and Zambia Part III contains two concluding chapters that tie the main threads of the volume together theoretically and empirically and discuss the contribution of the analytical framework the new regionalism approach NRA to the larger study of regionalism

In the Wake of Freedom S. P. Agrawal, 1997 *The Palgrave Handbook of Disciplinary and Regional Approaches to Peace* Oliver Richmond, Sandra Pogodda, Jasmin Ramovic, 2016-03-15 In this handbook a diverse range of leading scholars consider the social cultural economic political and developmental underpinnings of peace This handbook is a much needed response to the failures of contemporary peacebuilding missions and narrow disciplinary debates

both of which have outlined the need for more interdisciplinary work in International Relations and Peace and Conflict studies. Scholars, students, and policymakers are often disillusioned with universalist and northern-dominated approaches, and a better understanding of the variations of peace and its building blocks across different regions is required. Collectively, these chapters promote a more differentiated notion of peace, employing comparative analysis to explain how peace is debated and contested.

Borderland Battles Annette Idler, 2019. This book argues that borderlands intensify security threats at the conflict-crime nexus. It demonstrates the multiple insecurities that arise from complex interactions among rebels, criminals, and other violent non-state groups. Challenging urban biases and state-centric views, it draws on unprecedented multi-year fieldwork in the war-torn, marginalized Colombian, Ecuadorian, and Colombian Venezuelan borderlands.

The Short Guide to International Development Nick Sage, 2022-07-19. International development is a vibrant interdisciplinary area of the social sciences. This Short Guide offers a uniquely succinct and balanced account of this politically charged subject. It distills both the classic and newer debates together in a clear framework and illustrates them with contemporary examples. Designed to introduce a wide readership to international development, the book considers how far the field has been reconfigured over time and to what extent it is likely to change in the future. Reviews contemporary topics including tourism, migration, and digital technologies, includes distinctive international case studies and examples. By providing a succinct evaluation of competing approaches to and perspectives on the idea and practice of international development, this book offers students across the social sciences a distinct and invaluable introduction to the field.

Integral Human Development Séverine Deneulin, Clemens Sedmak, 2023-08-15. This volume brings into conversation two major moral traditions in the social sciences and humanities that offer common areas for understanding, interpreting, and transforming the world. Over the last decade, moral theologians who work on issues of poverty, social justice, human rights, and political institutions have been finding inspiration in the capability approach (CA). Conversely, social scientists who have been working on issues of poverty and social justice from a CA perspective have been finding elements in the Catholic social tradition (CST) to overcome some of the limitations of the CA, such as its vagueness regarding what counts as a valuable human life and its strong individual focus. Integral Human Development brings together for the first time social scientists and theologians in dialogue over their respective uses of CST and CA. The contributors discuss what their mutual grounds are, where they diverge, and where common areas of collaboration and transformative action can be found. The contributors offer a critical analysis of CA from the perspective of theology. They also provide an original account of CST. The book offers a broader historical, biblical, social, economic, political, and ecological understanding of CST than that which is currently available in the CST literature. The book will interest students and practitioners in global affairs, development studies, or the social sciences who seek to better understand the Catholic tradition and its social teachings and what they can offer to address current socio-environmental challenges.
