University Cut Off Points 2015:

Higher Education, Meritocracy and Inequality in China Ye Liu,2016-10-08 This book investigates the changing opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy. The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought. The second part then explores higher education reforms in China the part played by supposedly meritocratic forms of selection and the implications of these for social mobility. Based on original empirical data Ye Liu sheds light on the socio economic gender and geographical inequalities behind the meritocratic facade of the Gaokao. Liu argues that the Chinese philosophical belief in education based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education. When the Gaokao broke the promise of status improvement for rural students they turned to the Chinese Communist Party and sought political connections by actively applying for its membership. This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China. Written in an accessible style it offers a valuable resource for researchers and non-specialist readers alike.

Advancing Africa's Sustainable Development Alain L. Fymat,2018-11-14 While many African countries lag behind the rest of the industrialised world in scientific and medical research and development the situation is progressively improving. This is why the Society for the Advancement of Science in Africa was

established to contribute to economic advancement and sustainability through science research education and innovation This book provides a selection of papers from the Advancement of Science in Africa s fourth annual conference The conference was held under the overarching theme of science technology and innovation in Africa with several important sub themes including but not limited to improving health research and disease surveillance education collaborating in research responding to epidemic diseases with high mortality in Africa and promoting women s interest in science careers The collection illustrates how although the chapter contributors come from various countries and universities representing their own academic research they all share a common interest in advancing science technology and innovation in Africa A

Responding to Massification Philip G. Altbach,Liz Reisberg,Hans de Wit,2017-08-26 Global massification of postsecondary education with more than 200 million students studying at an untold number of institutions focusing on every specialization possible necessitates a differentiated system of postsecondary education in every country This book provides the first comparative study of how postsecondary education has evolved in 13 countries The study offers an analysis of current global realities and how different nations have constructed their response Our research shows that few countries have developed rational and differentiated academic systems to meet new realities The book provides insights regarding useful approaches for the development of academic systems The book reveals similarities and differences in the 13 case studies as different governments have expanded postsecondary education to respond to the massification of enrollment Postsecondary education has become diversified but for the most part not adequately differentiated in most countries Several of the case studies underscore the challenge of sustaining differentiation within the system if credentials from non university postsecondary institutions are considered of lesser social status Too often institutions that successfully address the practical needs of national economies are ultimately merged into the university system There is an urgent need for the planning and structuring of coherent systems of postsecondary education to serve the increasingly diverse clientele in need of the skills required by the knowledge economy This study is the first global analysis aimed at understanding how post secondary education can be organized to meet society s requirements and points to the need for designing coherent academic systems
