Remembering the Holocaust in a Racial State Roni Mikel-Arieli, 2022-07-18 The lens of apartheid era Jewish commemorations of the Holocaust in South Africa reveals the fascinating transformation of a diasporic community Through the prism of Holocaust memory this book examines South African Jewry and its ambivalent position as a minority within the privileged white minority Grounded in research in over a

dozen archives the book provides a rich empirical account of the centrality of Holocaust memorialization to the community's ongoing struggle against global and local antisemitism. Most of the chapters focus on white perceptions of the Holocaust and reveals the tensions between the white communities in the country regarding the place of collective memories of suffering in the public arena. However, the book also moves beyond an insular focus on the South African Jewish community and in very different modality investigates prominent figures in the anti-apartheid struggle and the role of Holocaust memory in their fascinating journeys towards freedom.

Locating Social Justice in Higher Education Research Jan McArthur, Paul Ashwin, 2020-03-19 This book focuses on the relations between social justice and higher education research. Jan McArthur and Paul Ashwin bring together chapters from international researchers that explore these relations in a range of national contexts and consider their implications for policies, pedagogy and our understanding of the roles of graduates in societies. As a whole, the book argues that social justice needs to be more than a topic of higher education research and must also be part of the way that research is undertaken. Social justice must be located in research practices as well as in the issues that are researched.

Transformative Innovation for Sustainable Human Settlements Andrew Emmanuel Okem, Sithembiso Lindelihle Myeni, Tshepang Mosiea, 2024-11-18 This book uses the transformative innovation policy (TIP) as a lens to show how innovative processes, practices and systems could address critical challenges and facilitate the delivery of sustainable human settlements in South Africa. The TIP approach shows that addressing societal problems is not a function of a technical solution within a government department but one that requires partnership with multiple stakeholders. The book argues that it is essential to understand and embrace innovation policy that is transformative and responds to the social and environmental needs at local, provincial and national levels. It demonstrates that innovation policy should focus on transforming the socio-technical systems that demand embracing notions such as experimental delivery and learning, directionality and inclusivity. Chapters explore the ability of the state to transform its organisational processes and capacity to improve and align its planning, implementation, monitoring and evaluation systems to high levels of efficiency and sustainability targets. Bringing together various theoretical and empirical perspectives on innovation in the context of sustainable human settlement, this book will be of interest to scholars and students in the fields of Housing, Human Settlements, Architecture, Public Policy, Development Studies, Civil Engineering, Political Science and Public Administration.

Research Ethics and Social Movements Kevin Gillan, Jenny Pickerill, 2016-04-14 What ethical challenges are faced by researchers studying social and political movements? Should scholars integrate their personal politics and identities into their research? What role should activists have in shaping the purposes or processes of social scientific research? How do changing political contexts affect the ethical integrity of a research project over time? These are some of the live issues of research ethics that face students and scholars whose research subjects are located in contentious political terrain. The contributors to this volume expose their own ethical thinking as they have met such challenges head-on. Each explores real dilemmas of

ethical practice on the ground as they carry out research on social movements across the globe Authors examining pro democracy activists in Malaysia sanctions breakers in the Gaza Freedom Flotilla environmental health organisations in North America and much else find that the narrow confines of Research Ethics Committees and Institutional Review Boards offer little guidance on the questions that really matter They offer instead a demonstration of continual reflexivity that is both personal and political in its approach This book opens up debate on research ethics delineating key challenges and offering hopeful and practical ways forward for real world ethical social science This book was published as a special issue of Social Movement Studies

Signergy C. Jac Conradie, Ronél Johl, Marthinus Beukes, Olga Fischer, Christina Ljungberg, 2010-05-26 The title of this volume strives to capture the dynamic scope and range of the essays it contains applying insights into the workings of iconicity to texts as far removed from each other in time as the Medieval tale of a bishop fish and the war poems of 20th century Italian Futurist F T Marinetti and as thematically diverse as the Pilgrim s Progress and the poetry of e e cummings Applications reference both language and linguistics as well as literature and literary theory and related fields such as sign language and translation the former approached from the point of view of Japan Sign Language the latter with reference to translations of the Koran and the Sesotho Bible as well as modern German and English Bible translations On the language side the intricate relationships between sound symbolism and etymology and between analogy and grammaticalization are examined in depth On the literary side the iconic effects of techniques such as enjambment and metrical inversion are considered but also the ways in which an understanding of iconicity can open up meanings in complex poetry like that of the Afrikaans poet T T Cloete in this particular instance three poems inspired by figures as diverse as Dante Paul Klee and the pop icon Marilyn Monroe In view of the fact that form is able to mime meaning and meaning itself can be mimed by meaning the theoretical question is asked on the basis of a wide range of examples from literature language music and other sign systems whether meaning can also mime form An introduction to the work of H C T Miller an early scholar in the field of iconicity highlights a regrettably little known South African contribution to the development of iconicity theory
