Open and Distance Education in Asia, Africa and the Middle East Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18 This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

The Legal Protection of Women From Violence Rashida Manjoo, Jackie Jones, 2018-03-22 Violence against women remains one of the most pervasive human rights violations in the world today and it permeates every society at every level. Such violence is considered a systemic, widespread and pervasive human rights violation experienced largely by women because they are women. Yet at the international level, there is a gap in the legal protection of women from violence. There is currently no binding international convention that explicitly prohibits such violence or calls for its elimination or mandates the criminalisation of all forms of violence against women. This book critically analyses the treatment of violence against women in the United Nations system and in three regional human rights systems. Each chapter explores the advantages and disadvantages coming from the legal instruments, the work of the monitoring systems and the resulting findings and jurisprudence. The book proposes that the gap needs to be addressed through a new United Nations Convention on the Elimination of All Forms of Violence against Women or alternatively an Optional Protocol to the Convention on the Elimination of all Forms of Discrimination against Women. A new Convention or Optional Protocol would be part of the transformative agenda that is needed to normatively address the promotion of a life free of violence for women, the responsibility of states to act with due diligence in the elimination of all forms of violence against all women and the systemic challenges that are the causes and consequences of such violence.

The Right to Development in Africa Carol Chi Ngang, 2021-10-18 In *The Right to Development in Africa*, Carol Chi Ngang provides a conceptual analysis of the human right

to development with a decolonial critique of the requirement to have recourse to development cooperation as a mechanism for its realisation In his argumentation the setbacks to development in Africa are not necessarily caused by the absence of development assistance but principally as a result of the lack of an operational model to steer the processes for development towards the highest attainable standard of living for the peoples of Africa Basing on the decolonial and capability theories he posits for a shift in development thinking from dependence on development assistance to an alternative model suited to Africa which he defines as the right to development governance

South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are

they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Virtues and Fallacies of VAT: An Evaluation after 50 Years Robert F. van Brederode, 2021-08-09 Value added tax VAT is a mainstay of revenue systems in more than 160 countries Because consumption is a more stable revenue base than other tax bases VAT is less distorting and hence more likely to encourage investment savings optimum labor supply decisions and growth VAT is not without criticism however and faces its own specific technical and policy challenges This book the first to thoroughly evaluate VAT from a global policy perspective after

over 50 years of experience with its intricacies offers authoritative perspectives on VAT's full spectrum from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality. The contributors, leading tax practitioners and academics, examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book, including revenue generation and revenue efficiency, single rate versus multiple rates, susceptibility to fraud, exemptions and exceptions, compliance cost for businesses, policy and compliance gaps in revenue collection, adjustment rules caused by the transactional nature of the tax, transfer pricing issues, treatment of vouchers, permanent establishments and holding companies, payment of refunds, cross-border digital transactions and supplies for free or below cost price. The second part offers six country reports on New Zealand, Japan, China, Colombia, Ethiopia and India to demonstrate the different ways in which VAT operates in a variety of national economies. Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one, it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions. This invaluable book serves as an expert guide to VAT policy development in this area. It will be welcomed not only by concerned government officials but also by tax professionals, both lawyers and accountants, and academics in tax law.

The End of Compassion Alejandro Portes, Patricia Fernandez-Kelly, 2020-12-17 This book brings together the most recent and the most comprehensive collection of articles on a population at risk: the children of immigrants in the United States, especially those children whose parents came to the country without legal authorization. The end of compassion and the shift to temporary migration to source the labour needs of the American economy have brought in their wake a series of consequences, some of which were predictable and others unexpected. The chapters fully document the nature and implications of the enforcement initiatives implemented by the American government in recent years and their interaction with state policies and local contexts of reception. This collection provides an exhaustive testimony of the severe conditions faced by unauthorized migrant families and their children today and their repercussions in both countries of origin and those where they currently live. **The End of Compassion** will be of interest to researchers and academics studying migration in the United States and ethnic and racial studies and to advanced students of sociology, public policy, law and political science. This book was originally published as a special issue of the journal *Ethnic and Racial Studies*.

Abiotic Stresses in Agroecology: A Challenge for Whole Plant Physiology Mauro Centritto, 2017-07-04 Understanding plant responses to abiotic stresses is central to our ability to predict the impact of global change and environmental pollution on the production of food, feed and forestry. Besides increasing carbon dioxide concentration and rising global temperature, increasingly frequent and severe climatic events, e.g. extended droughts, heat waves, flooding, are expected in the coming decades. Additionally, pollution, e.g. heavy metals, gaseous pollutants such as ozone or sulfur dioxide, is an important factor in many regions, decreasing plant productivity and product quality. Higher Education Pathways Paul Ashwin,M. Case,2018-12-13 In what ways does access to undergraduate education have a transformative impact on people and societies What conditions are required for this impact to occur What are the pathways from an undergraduate education to the public good including inclusive economic development These questions have particular resonance in the South African higher education context which is attempting to tackle the challenges of widening access and improving completion rates in in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as central to addressing skills shortages in South Africa It is also seen to yield significant social returns including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues

Assessing Academic Literacy in a Multilingual Society Albert Weideman,John Read,Theo du Plessis,2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience

Resilience and Sustainability in Urban Africa Innocent Chirisa,Andrew Chigudu,2021-08-02 Resilience has become a very topical issue transcending many spheres and sectors of sustainable urban development This book presents a resilience framework for sustainable cities and towns in Africa The rise in informal settlements is due to the urban planning practices in most African cities that rarely reflect the realities of urban life and environment for urban development Aspects of places people and process are central to the concept of urban resilience and sustainable urban growth It stems from the observation that urban vulnerability is on the increase in

Zimbabwe and beyond In history disasters have adversely affected nations across the world inflicting wide ranging losses on one hand while on the other hand creating development opportunities for urban communities Cooperation in disaster management is a strategy for minimising losses and uplifting the affected urban settlements The significance of urban planning and design in the growth and development of sustainable urban centres is well documented Urbanisation has brought with it challenges that most developing countries such as Zimbabwe are not equipped to handle This has been accompanied by problems such as overpopulation overcrowding shortages of resources and the growth of slum settlements There need is to seriously consider urban planning and design in order to come up with contemporary designs that are resilient to current urban challenges There are major gaps in urban resilience building for instance in Harare and the local authority needs to prioritise investment in resilient urban infrastructure
