Cox, 2025-02-27 In South Africa it is thirty years since apartheid was overthrown The country now teeters on being a failed state But South African history cannot be explained in isolation from developments in the rest of the world Nor can it be understood in terms of change from a regime where race seemed all determining to one where race is supposed to be a matter of indifference Rather this book argues that the key to understanding South Africa lies in the logics of capitalist development These explain why capitalist domination has taken racial forms and why global conditions have been so important **Infrastructures for Peace in Sub-Saharan Africa** Mediel Hove, Geoff Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the

potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it
