dispossessed by administrators heedless of local management practices many former residents continue to maintain a close connection with the forest not only to sustain their livelihoods but also to maintain their intimate links with ancestral lands where their stories and memories are materially inscribed and powerfully invoked Intimate connections to the forest are revealed to be as political as the use of its resources culminating in local claims for redress of historical dispossessions sustain their livelihoods but also to maintain their intimate links with ancestral lands where their stories and memories are materially inscribed and powerfully invoked Intimate connections to the forest are revealed to be as political as the use of its resources culminating in local claims for redress of historical dispossessions sustain their livelihoods but also to maintain their intimate links with ancestral lands where their stories and memories are materially inscribed and powerfully invoked Intimate connections to the forest are revealed to be as political as the use of its resources culminating in local claims for redress of historical dispossessions sustain their livelihoods but also to maintain their intimate links with ancestral lands where their stories and memories are materially inscribed and powerfully invoked Intimate connections to the forest are revealed to be as political as the use of its resources culminating in local claims for redress of historical dispossessions

Migration in Africa Michiel de Haas,Ewout Frankema,2022-03-30 This book introduces readers to the age of intra African migration a period from the mid 19th century onward in which the center of gravity of African migration moved decisively inward Most books tend to zoom in on Africa s external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries The book demonstrates that only by taking a broad historical and continent wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time During the 19th century Africa s external slave trades gradually declined whilst Africa s expanding commodity export sectors drew in domestic labor This led to an era of heightened mobility within the region marked by rapidly rising and vanishing migratory flows increasingly diversified landscapes of migration systems and profound long term shifts in the wider patterns of migration This era of inward focused mobility reduced with a resurgence of outmigration after 1960 when Africans became more deliberate in search of extra continental destinations with new diaspora communities emerging specifically in the Global North Broad ranging in its temporal spatial and thematic coverage this book provides students and researchers with the perfect introduction to age of intra African migration

Stewart,2019-07-09 Soil degradation is a widespread problem in Africa resulting in decreased agricultural productivity while demand for food continues to increase Degradation is caused by accelerated erosion acidification contamination depletion of soil organic matter and plant nutrients and salinization The major cause of soil degradation in Africa is uncontrolled and excessive grazing in the savanna regions followed by deforestation and the use of inappropriate and extractive farming practices Perpetual neglect of the health of soils in Africa can exacerbate the already serious problems of food and nutritional insecurity and environmental degradation Food and nutritional security of the growing population of Africa can only be achieved if degraded soils are restored and soils of agroecosystems are managed prudently and sustainably Ignoring soils and taking the fragile finite and precious soil resources for granted is the principal
