Pollack,2000-11-01 Are there parallels between the moment of insight in science and the emergence of the unknowable in religious faith Where does scientific insight come from Award winning biologist Robert Pollack argues that an alliance between religious faith and

science is not necessarily an argument in favor of irrationality the two can inform each other's visions of the world Pollack begins by reflecting on the large questions of meaning and purpose and the difficulty of finding either in the orderly world described by the data of science He considers the obligation to find meaning and purpose despite natural selection's claim to be a complete explanation of our presence as a species a claim that calls upon neither natural intention nor design nor Designer Next the book focuses on matters of free will from the choice of a scientist to accept evidence to the choice of a religious person to accept a revelation to a patient's loss of free will in medical treatment Here Pollack addresses questions of ethics and offers a provocative comparison of two difficult texts whose contents remain incompletely understood the DNA text of the human genome and the Hebrew record of Jewish written and oral law In closing Pollack considers the promise of genetic medicine in enabling us to glimpse our own future and offers a reconsideration of the possible utility of the so called placebo effect in curing illness Whether refuting a DNA based biological model of Judaism or discussing the Darwinian concept of the species Pollack under the banner of free inquiry presents a genuine vital and well argued assay of the intersection of science and religion

Why We Are Restless Benjamin Storey, Jenna Silber Storey, 2022-10-25 A compelling exploration of how our pursuit of happiness makes us unhappy We live in an age of unprecedented prosperity yet everywhere we see signs that our pursuit of happiness has proven fruitless Dissatisfied we seek change for the sake of change even if it means undermining the foundations of our common life In *Why We Are Restless* Benjamin and Jenna Storey offer a profound and beautiful reflection on the roots of this malaise and examine how we might begin to cure ourselves Drawing on the insights of Montaigne Pascal Rousseau and Tocqueville *Why We Are Restless* explores the modern vision of happiness that leads us on and the disquiet that follows it like a lengthening shadow In the sixteenth century Montaigne articulated an original vision of human life that inspired people to see themselves as individuals dedicated to seeking contentment in the here and now but Pascal argued that we cannot find happiness through pleasant self seeking only anguished God seeking Rousseau later tried and failed to rescue Montaigne's worldliness from Pascal's attack Steeped in these debates Tocqueville visited the United States in 1831 and observing a people restless in the midst of their well being discovered what happens when an entire nation seeks worldly contentment and finds mostly discontent Arguing that the philosophy we have inherited despite pretending to let us live as we please produces remarkably homogenous and unhappy lives *Why We Are Restless* makes the case that finding true contentment requires rethinking our most basic assumptions about happiness
