Oxford Textbook of Otolaryngology John S. Phillips, Steven M. Powell, Rajiv Bhalla, Vinidh Paleri, 2025-10-16 Otorhinolaryngology head and neck surgery ORL HNS is a surgical subspecialty that affects all age groups and covers a wide range of pathologies and treatments from the commonest of conditions seen in primary care to some of the rarest requiring tertiary investigation and state of the art treatments This makes it difficult for those training and working in ORL HNS and its allied specialities to learn about and keep up to date with all its component parts The Oxford Textbook of Otolaryngology provides a solution A comprehensive guide to all aspects of the speciality the textbook covers all the knowledge that clinicians from all subspecialties of otolaryngology requires to keep abreast of current practice with a strong emphasis on evidence based practice The textbook is divided into sections on Otology and Audiology Rhinology Head and Neck Surgery and Paediatric Otolaryngology These sections are then further divided into two broad sub sections the first covering common presenting symptoms and signs and the second covering specific conditions The introductory chapters of this book aim to provide insight into emerging aspects of medicine that are essential for the day to day practice of otolaryngology before moving on to the more specific areas highlighted The textbook is the perfect resource to aid an otolaryngology trainee in passing key examinations while also suitable for established specialists to help remain up to date and to meet the necessary requirements for revalidation Language and Television Series Monika Bednarek, 2018-10-04 This book offers a comprehensive linguistic analysis of contemporary US television series Adopting an interdisciplinary and multimethodological approach Monika Bednarek brings together linguistic analysis of the Sydney Corpus of Television Dialogue with analysis of scriptwriting manuals interviews with Hollywood scriptwriters and a survey undertaken with

university students about their consumption of TV series In so doing she presents five new and original empirical studies The focus on language use in a professional context the television industry on scriptwriting pedagogy and on learning and teaching provides an applied linguistic lens on TV series This is complemented by perspectives taken from media linguistics corpus linguistics and sociocultural linguistics sociolinguistics Throughout the book multiple dialogue extracts are presented from a wide variety of well known fictional television series including The Big Bang Theory Grey s Anatomy and Bones Researchers in applied linguistics discourse analysis critical discourse analysis corpus linguistics sociolinguistics and media linguistics will find the book both stimulating and unique in its approach **Researching Vocabulary N.**

Schmitt,2010-08-18 The book overviews a wide range of vocabulary research methodologies and offers practical advice on how to carry out valid and reliable research on first and second language vocabulary It includes a Resources section which outlines the lexical tests corpora software internet sites and other resources available to vocabulary researchers *Corpus Linguistics. Volume 1* Anke Lüdeling,Merja Kytö,2008-12-10 This volume provides an up to date survey of the field of corpus linguistics a field whose methodology has revolutionized much of the empirical work done in most fields of linguistic study over the past decade Corpus linguistics investigates human language by starting out from large collections of texts spoken written or recorded These language corpora which are now regularly available in electronic form are the basis for quantitative and qualitative research on almost any question of linguistic interest Many techniques that are in use in corpus linguistics today are rooted in the tradition of the late 18th and 19th century when linguistics began to make use of mathematical and empirical methods Modern corpus linguistics has used and developed these methods in close connection with computer science and computational linguistics The handbook sketches the history of corpus linguistics shows its potential discusses its problems and describes various methods of collecting annotating and searching corpora as well as processing corpus data It also reports case studies that illustrate the wide range of linguistic research questions addressed in corpus linguistics The over 60 articles included in the handbook are divided into five sections 1 the origins and history of corpus linguistics and surveys of its relationship to central fields of linguistics 2 corpus compilation 3 corpus types 4 preprocessing of corpora 5 the use and exploitation of corpora The final section gives an overview of the results of corpus studies obtained in phonetics phonology morphology syntax semantics sociolinguistics historical linguistics stylometry dialectology and discourse analysis It also reports on recent advances made in human and machine translation contrastive studies computer assisted language learning and automatic summarization The contributors to the volume are internationally known experts in their respective fields The handbook is intended for a wide audience ranging from teachers university students and scholars to anyone interested in the use of computers in linguistic analyses and applications

Emotion-Oriented Systems Paolo Petta,Catherine Pelachaud,Roddy Cowie,2011-02-04 Emotion pervades human life in general and human communication in particular and this sets information technology a challenge Traditionally IT has focused

on allowing people to accomplish practical tasks efficiently setting emotion to one side That was acceptable when technology was a small part of life but as technology and life become increasingly interwoven we can no longer ask people to suspend their emotional nature and habits when they interact with technology The European Commission funded a series of related research projects on emotion and computing culminating in the HUMAINE project which brought together leading academic researchers from the many related disciplines This book grew out of that project and its chapters are arranged according to its working areas theories and models signals to signs data and databases emotion in interaction emotion in cognition and action persuasion and communication usability and ethics and good practice The fundamental aim of the book is to offer researchers an overview of the related areas sufficient for them to do credible work on affective or emotion oriented computing The book serves as an academically sound introduction to the range of disciplines involved technical empirical and conceptual and will be of value to researchers in the areas of artificial intelligence psychology cognition and user machine interaction Industrial Hygiene Control of Airborne Chemical Hazards, Second Edition William
