limitations and provides practical guidance on how to learn skills relevant to applying the method The volume fulfills several critical roles First by introducing and discussing methods in the philosophy of science the collection increases philosophers awareness of methodological options of particular importance for younger scholars who are often not exposed to the diversity of practice Second the collection s practical focus will aid established philosophers in diversifying their own methodological toolkits Third collecting this diversity serves as a ground for philosophical reflection on what we as philosophers take ourselves to be capable of Fourth the collection hopes to increase interdisciplinary links between philosophy and other fields by laying clear the methodological continuity and complement between them

A Contemporary Comprehensive Economic Science
 Stefano Spalletti, Francesca Spigarelli, 2025-11-18. Covering Maffeo Pantaleoni's key areas of contribution to economics, this book provides a comprehensive study of one of the foremost economic thinkers of the late 19th and early 20th centuries. Called the prince of Italian economists by Piero Sraffa, among others, Maffeo Pantaleoni (1857-1924) was an original and innovative thinker but also bizarre and extravagant. As a result, he did not produce an inherently continuous and systematic work, but his contributions oscillate between a shifting idealism and heterogeneous operational criteria. Contrasting with the specialisation which pervades the economic sciences today, rereading Pantaleoni one hundred years after his death, it is clear that he excelled in pure as much as in applied economics, in public economics as in statistical or historical economic studies. Overall, his expertise spanned fields of economics that are now considered disaggregated and distant from each other. Thus, the Pantaleonian spirit, which was innovative and completist and could not be confined within any enclosure, was lost a century ago. This volume brings together a group of specialists capable of identifying the many points of contact between Pantaleoni's multiform thought and the disciplinary plurality of his economics, thus providing a Complete Economic Science of which Pantaleoni would be proud. The book will be of interest to economists, readers in history of economic thought, intellectual history, Italian history, more broadly, and scholars with diverse profiles of interest.
