Stereotypic Animal Behaviour

Georgia Mason, Jeffrey Rushen, 2008-04-09 Abnormal behaviour patterns from the jumping and somersaulting of caged laboratory mice to the pacing of enclosed big cats are displayed by many millions of farm zoo research and companion animals Including new chapters and over 30 contributors this book focuses on the causation and treatment of these environment induced stereotypic behaviours and their implications for animal welfare and normalcy of brain functioning The book begins by taking an ethological perspective focusing on the constraints captivity places on animals normal behavioural repertoires and the effects these have on specific motivational systems It then addresses the role of dysfunction particularly the impact of chronic stress and impoverished environments on brain functioning The book then moves on to explore how stereotypic behaviours can be tackled once they have emerged using diverse techniques from environmental enrichment to pharmaceutical intervention It concludes by giving a new definition for stereotypic behaviour and a discussion of future research directions

The Wild Within Andrew Brogan, 2018-02-22 Established in 1836 the Bristol Zoo is the world's oldest surviving zoo outside of a capital city and has frequently been at the vanguard of zoo innovation In *The Wild Within* Andrew Flack uses the experiences of the Bristol Zoo to explore the complex and ever changing relationship between human and beast which in many cases has altered radically over time Flack recounts a history in which categories and identities combined converged

and came into conflict as the animals at Bristol proved to be extremely adaptive He also reveals aspects of the human animal bond however that have remained remarkably consistent not only throughout the zoo s existence but for centuries including the ways in which even the captive animals with the most distinct qualities and characteristics are misunderstood when viewed through an anthropocentric lens Flack strips back the layers of the human animal relationship from those rooted in objectification and homogenization to those rooted in the recognition of consciousness and individual experience The multifaceted beasts and protean people in *The Wild Within* challenge a host of assumptions both within and outside the zoo about what it means to be human or animal in the modern world
