Comics and the Senses Ian Hague,2014-01-10 Attempts to define what comics are and explain how they work have not always been successful because they are premised upon the idea that comic strips comic books and graphic novels are inherently and almost exclusively visual This book challenges that premise and asserts that comics is not just a visual medium The book outlines the multisensory aspects of comics the visual audible tactile olfactory and gustatory elements of the medium It rejects a synaesthetic approach by which all the senses are engaged through visual stimuli and instead argues for a truly multisensory model by which the direct stimulation of the reader's physical senses can be understood A wide range of examples demonstrates how multisensory communication systems work in both commercial and more experimental contexts The book concludes with a case study that looks at the works of Alan Moore and indicates areas of interest that multisensory analysis can draw out but which are overlooked by more conventional approaches *A Companion to Contemporary Drawing* Kelly Chorpening,Rebecca Fortnum,2020-11-10 The first university level textbook on the power condition and expanse of contemporary fine art drawing *A Companion to Contemporary Drawing* explores how 20th and 21st century artists have used drawing to understand and comment on the world Presenting contributions by both theorists and practitioners this unique textbook considers the place space and history of drawing and explores shifts in attitudes towards its practice over the years Twenty seven essays discuss how drawing emerges from the mind of the artist to question and reflect upon what they see feel and experience This book discusses key themes in contemporary drawing practice addresses the working conditions and context of artists and considers a wide range of personal social and political considerations that influence artistic choices Topics include the politics of eroticism in South American drawing anti capitalist drawing from Eastern Europe drawing and conceptual art feminist drawing and exhibitions that have put drawing practices at the centre of contemporary art This textbook Demonstrates ways contemporary issues and concerns are addressed through drawing Reveals how drawing is used to make powerful social and political statements Situates works by contemporary practitioners within the context of their historical moment Explores how contemporary art practices utilize drawing as both process and finished artifact Shows how concepts of observation representation and audience have changed dramatically in the digital era Establishes drawing as a mode of thought Part of the acclaimed Wiley Blackwell Companions to Art History series *A Companion to Contemporary Drawing* is a valuable text for students of fine art art history and curating and for practitioners working within contemporary fine art practice *Documentary Comics* Nina Mickwitz,2016-04-29 Can comics be documentary and can documentary take the form of and thus be comics Examining comics as documentary this book challenges the persistent assumption that ties documentary to recording technologies and instead engages an understanding of the category in terms of narrative performativity and witnessing Through a cluster of early twenty first century comics Nina Mickwitz argues that these comics share a documentary ambition to visually narrate and represent aspects and events

of the real world Autobiographical Comics Elisabeth El Refaie, 2012-10-24 A troubled childhood in Iran Living with a disability Grieving for a dead child Over the last forty years the comic book has become an increasingly popular way of telling personal stories of considerable complexity and depth In Autobiographical Comics Life Writing in Pictures Elisabeth El Refaie offers a long overdue assessment of the key conventions formal properties and narrative patterns of this fascinating genre The book considers eighty five works of North American and European provenance works that cover a broad range of subject matters and employ many different artistic styles Drawing on concepts from several disciplinary fields including semiotics literary and narrative theory art history and psychology El Refaie shows that the traditions and formal features of comics provide new possibilities for autobiographical storytelling For example the requirement to produce multiple drawn versions of one's self necessarily involves an intense engagement with physical aspects of identity as well as with the cultural models that underpin body image The comics medium also offers memoirists unique ways of representing their experience of time their memories of past events and their hopes and dreams for the future Furthermore autobiographical comics creators are able to draw on the close association in contemporary Western culture between seeing and believing in order to persuade readers of the authentic nature of their stories **The ^AOxford Handbook of Comic Book Studies** Frederick Luis Aldama, 2020-04-01 The Oxford Handbook of Comic Book Studies examines the history and evolution of the visual narrative genre from a global perspective The Handbook brings together readable jargon free essays written by established and emerging scholars from diverse geographic institutional gender and national backgrounds *How to Read Nancy* Paul Karasik, Mark Newgarden, 2017-10-31 Everything that you need to know about reading making and understanding comics can be found in a single Nancy strip by Ernie Bushmiller from August 8 1959 Paul Karasik and Mark Newgarden's groundbreaking work *How to Read Nancy* ingeniously isolates the separate building blocks of the language of comics through the deconstruction of a single strip No other book on comics has taken such a simple yet methodical approach to laying bare how the comics medium really works No other book of any kind has taken a single work by any artist and minutely and entertainingly pulled it apart like this *How to Read Nancy* is a completely new approach towards deep reading art In addition *How to Read Nancy* is a thoroughly researched history of how comics are made from their creation at the drawing board to their ultimate destination at the bookstore Textbook art book monogram dissection *How to Read Nancy* is a game changer in understanding how the simplest drawings grab us and never leave Perfect for students academics scholars and casual fans **The Narratology of Comic Art** Kai Mikkonen, 2017-05-08 By placing comics in a lively dialogue with contemporary narrative theory *The Narratology of Comic Art* builds a systematic theory of narrative comics going beyond the typical focus on the Anglophone tradition This involves not just the exploration of those properties in comics that can be meaningfully investigated with existing narrative theory but an interpretive study of the potential in narratological concepts and analytical procedures that has hitherto been overlooked This research monograph is then not an application of

narratology in the medium and art of comics but a revision of narratological concepts and approaches through the study of narrative comics Thus while narratology is brought to bear on comics equally comics are brought to bear on narratology

The Visible Text Thomas A. Bredehoft, 2014-01-16 Oxford Textual Perspectives is a new series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works Covering materials ranging from Anglo Saxon manuscripts and inscribed objects to

contemporary comics The Visible Text rewrites the history of textual media and technologies Arguing that media are not defined by technologies alone but by a combination of technologies and the ideas that people hold about those technologies Bredehoft identifies four distinct periods or domains in the history of English literature that correspond to four ways in which media ideologies interacted with the two basic defining technologies of manuscripts and printed books Examining two complementary ways of defining texts as subject to a reproductive medium on the one hand and as surrounded and defined by paratexts on the other The Visible Text points out how Anglo Saxon manuscripts and contemporary comics share a remarkable similarity in being structured as productions rather than reproductions Contrastingly the late medieval and print era periods share a cultural investment in textual reproduction but they differ both in their characteristic technologies and in how they conceptualize the object of reproduction itself A final epilogue briefly considering the nature of electronically mediated textuality highlights the importance of understanding the history addressed here as electronic text both parallels and departs from typographic print in ways that earlier reproductive domains clarify and complicate Filled with concrete examples of both books and texts The Visible Text will be of interest to readers in the fields of literature book history literary theory media studies and visual culture
