1640-1789 Robert DeMaria, Jr., 2018-04-03 An indispensable reference for scholars and students of eighteenth century English literature This addition to the celebrated Wiley Blackwell Keywords series explores the meanings of fifty eight of the most important words in British literature of the period 1640-1789 Professor DeMaria focuses on words used with frequency and urgency throughout the works of most major and several minor writers of the British Neoclassical era with the occasional reach back to the early seventeenth century for a definitive usage found in Francis Bacon for instance and look forward to the nineteenth century to the works of Wordsworth Austen and Keats Through discussions of words such as atom economy humanity labor machine slavery society and system he reveals underlying assumptions about the way writers of the period thought about the physical and social world Likewise considerations of words such as happiness passion truth and virtue shed light on the ethical and moral commitments of the age Unlike dictionaries and many big data semantics projects

this book brings forth the ambiguities nuances and ironies that accrued to word usages during the period through a heightened awareness of the contexts in which they occurred Highlights and exposes the salient cultural and literary debates and metamorphic moments of cultural thought Reveals an increase in irony and a decrease in allegorical usage as an important trend in the evolution of literary language during the Neoclassical period Stresses the contexts within which words or phrases appear in order to offer a fuller understanding of their meanings and significance than available from digital databases Draws upon a vast compilation of sources from one of the most transformative eras of English literature Rigorous in its scholarship and historical reach British Literature 1640 1789 Keywords is an indispensable resource which scholars and students of British Neoclassical literature will want to keep close at hand It is certain to become a fixture of most university reference libraries

Political Magic Christopher F. Loar, 2014-06-05 Political Magic examines early modern British fictions of exploration and colonialism arguing that narratives of intercultural contact reimagine ideas of sovereignty and popular power These fictions reveal aspects of political thought in this period that official discourse typically shunted aside particularly the political status of the commoner whose liberty was often proclaimed even as it was undermined both in theory and in practice Like the Hobbesian sovereign the colonist appears to the colonized as a giver of rules who remains unruly At the heart of many texts are moments of savage wonder provoked by European displays of technological prowess In particular the trope of the first gunshot articulates an origin of consent and political legitimacy in colonial showmanship Yet as manifestations of force held in abeyance these technologies also signal the ultimate reliance of sovereigns on extreme violence as the less than mystical foundation of their authority By examining works by Cavendish Defoe Behn Swift and Haywood in conjunction with contemporary political writing and travelogues Political Magic locates a subterranean discourse of sovereignty in the century after Hobbes finding surprising affinities between the government of savages and of Britons
