London Printseller Alexander V. Globe,2011-11-01 From the 15th century on engravings influenced European culture almost as profoundly as books Like stained glass windows in the Middle Ages or television today popular prints were designed to reach even the lowest orders of society In the 17th century Peter Stent whose shop stood outside Newgate was England s most prolific seller of popular prints maps and copybooks to the working and rising middle classes His inventory of copper plates reflected the shifts of popular tastes during this period and commented directly on the turbulent events of the day In documenting Stent s output Alexander Globe studied the printsellers advertising catalogues as external controls for reconstructing inventories as well as indices to contemporary tastes From these and other contemporary sources Globe cites every engraving and book attributable to Stent breaking down the material into types portraits maps miscellaneous sheets and books including works on handwriting politics natural history anatomy costume and architecture References and additions are made to the catalogues of Donald Wing and A M Hind Globe takes the history of engraving beyond Hind by including prints from the Commonwealth Protectorate and early Restoration periods Eight appendices supplement the catalogue information They provide evidence for print identificiation discuss paper sizes and list Stent s artists suppliers and business associates All the collectiions in which Stent items may be found are named The volume concludes with a

bibliography and indices of subject as well as post 17th century authors. Stent's introduction to Stent's work is concerned with the social, political, and economic conditions leading to the emergence of a popular printseller who catered to a different clientele from that usually studied by art historians. Stent's career illustrates the mid 17th century commercial revolution which saw the artisan's customers change from the wealthy leisure class to the worker who wanted mass-produced cheap goods. Drawing on material in a hundred libraries and museums around the world, the catalogue describes over fifteen hundred engravings including 319 sheets and five books of portraits, 42 maps, 102 miscellaneous prints and sets with religious, classical, heraldic, and satirical subjects, and 86 books on handwriting, politics, military training, natural history, figure sketches, costume, architecture, and ornament. Richly illustrated with 319 plates, Peter Stent will prove valuable not only to print dealers, art historians, museums, and libraries but also to social, cultural, and political historians.

British Museum
 British Museum. Map Room, 1885. Catalogue of the Books, Manuscripts, Maps and Drawings in the British Museum (Natural History) ... British Museum (Natural History). Library, 1904. Portraying the Land Rehav Rubin, 2018-05-22. The book presents and discusses a large corpus of Jewish maps of the Holy Land that were drawn by Jewish scholars from the 11th to the 20th century and thus fills a significant lacuna both in the history of cartography and in Jewish studies. The maps depict the biblical borders of the Holy Land, the allotments of the tribes, and the forty years of wanderings in the desert. Most of these maps are in Hebrew, although there are several in Yiddish, Ladino, and in European languages. The book focuses on four aspects: it presents an up-to-date corpus of known maps of various types and genres; it suggests a classification of these maps according to their source, shape, and content; it presents and analyses the main topics that were depicted in the maps; and it puts the maps in their historical and cultural contexts, both within the Jewish world and the sphere of European cartography of their time. The book is an innovative contribution to the fields of history of cartography and Jewish studies. It is written for both professional readers and the general public. The Hebrew edition, 2014, won the Izhak Ben Zvi Prize.

Sir Francis Drake's West Indian Voyage, 1585-86 Mary Frear Keeler, 2017-05-15. Significant in the history of Anglo-Spanish relations and of English ventures was Drake's expedition to the West Indies in 1585-86. His raids on Spanish towns on both sides of the Atlantic were aimed not only to gather treasure but to bring a military challenge to the empire of Philip II. The voyage was linked also with the plantation projects of Raleigh and ended with Drake bringing home the discouraged settlers of the first Virginia colony. Although not a financial success, the expedition attracted wide attention in England and the continent and was a prelude to the events of 1588. For over three centuries after the voyage, the main source

of information about it was the lively narrative strongly propagandistic in tone that was published in 1588 and 1589 In the present volume this account attributed to Captain Walter Bigges has been critically edited in the light of evidence now available from English and Spanish sources Printed also are documents relating to ships and personnel and to financial accounts of the expedition Included too are the journal from the vice admiral s ship the Primrose edited from the original manuscript the fragmentary journals from ships of two other major officers and an important newsletter Among illustrations are a previously unpublished map relating to Drake s stop at Vigo as well as the Boazio maps which are shown in differing sizes and details Dr Keeler s introduction discusses the expedition in the context of Elizabethan policies in the pre Armada years She points out new evidence on Drake s administrative practices on his negotiations with Spanish officials and on his dealings with a troublesome rear admiral Appendices provide critical notes on the Boazio maps and on the circumstances of the publication of the Bigges account This is a new print on demand hardback edition of the volume first published in 1981
