

The background of the book cover is a photograph of a wide, paved road or path that stretches into the distance. On the left side of the path, there is a line of people, possibly a crowd or a group of cyclists, though they are small and somewhat blurred. The path is flanked by green, rolling hills or mountains under a clear blue sky. The overall scene suggests a sense of movement and open space.

Urban Revolutions Stefan Kipfer, 2022-09-19

What do struggles over pipelines in Canada housing estates in France and shantytowns in Martinique have in common In Urban Revolutions Stefan Kipfer shows how these struggles force us to understand the neo colonial aspects of capitalist urbanization in a comparatively and historically nuanced fashion In so doing he demonstrates that urban research

can offer a rich if uneven terrain upon which to develop the relationship between Marxist and anti colonial intellectual traditions After a detailed dialogue between Henri Lefebvre and Frantz Fanon Kipfer engages creole literature in the French Antilles Indigenous radicalism in North America and political anti racism in mainland France New Urban Spaces Neil Brenner,2019-05-24 In New Urban Spaces Neil Brenner proposes a radical reconceptualization of inherited approaches to urbanization Rather than focusing on cities as bounded units urbanization is conceived here as multiscalar Drawing on the methods of critical geopolitical economy especially the writings of Henri Lefebvre Brenner systematically elaborates this multiscalar conceptualization of the capitalist urban fabric in order to investigate emergent patterns and pathways of urban restructuring *Exploring the Production of Urban Space* Michael Edema Leary-Owhin,2016-02-26 This important book engages critically with Lefebvre s spatial theories and challenges recent thinking about the nature of urban space Research in three iconic post industrial cities in the UK and North America explains how urban public spaces including differential space are socially produced **Routledge Handbook of Critical International Relations** Jenny Edkins,2019-03-11 Critical international relations is both firmly established and rapidly expanding and this Handbook offers a wide ranging survey of contemporary research It affords insights into exciting developments more challenging issues and less prominent topics examining debates around questions of imperialism race gender ethics and aesthetics and offering both an overview of the existing state of critical international politics and an agenda setting collection that highlights emerging areas and fosters future research Sections cover critique and the discipline relations beyond humanity art and narrative war religion and security otherness and diplomacy spaces and times resistance and embodiment and intimacy An international group of expert scholars whose contributions are commissioned for the volume provide chapters that facilitate teaching at advanced undergraduate and postgraduate level inspire new generations of researchers in the field and promote collaboration cross fertilisation and inspiration across sub fields often treated separately such as feminism postcolonialism and poststructuralism The volume sees these strands as complementary not contradictory and emphasises their shared political goals shared theoretical resources and complementary empirical practices Each chapter offers specific focused in depth analysis that complements and exemplifies the broader coverage making this Routledge Handbook of Critical International Relations essential reading for all students and scholars of international relations **The Routledge Handbook of Architecture, Urban Space and Politics, Volume II** Nikolina Bobic,Farzaneh Haghighi,2024-11-22 Architecture and the urban are connected to challenges around violence security race and ideology spectacle and data The first volume of this handbook extensively explored these oppressive roles This second volume illustrates that escaping the corporatized and bureaucratized orders of power techno managerial and consumer oriented capitalist economic models is more urgent and necessary than ever before Herein lies the political role of architecture and urban space including the ways through which they can be transformed and alternative political realities constituted The volume explores the methods and spatial practices required to

activate the political dimension and the possibility for alternative practices to operate in the existing oppressive systems while not being swallowed by these structures. Fostering new political consciousness is explored in terms of the following themes: Events and Dissidence, Biopolitics, Ethics and Desire, Climate and Ecology, Urban Commons and Social Participation, Marginalities and Postcolonialism. Volume II embraces engagement across disciplines and offers a wide range of projects and critical analyses across the so-called Global North and South. This multidisciplinary collection of 36 chapters provides the reader with an extensive resource of case studies and ways of thinking for architecture and urban space to become more emancipatory. Skateboarding and the City Iain Borden, 2019-02-21

Skateboarding is both a sport and a way of life. Creative, physical, graphic, urban, and controversial, it is full of contradictions, a billion-dollar global industry which still retains its vibrant counter-cultural heart. *Skateboarding and the City* presents the only complete history of the sport, exploring the story of skate culture from the surf beaches of 60s California to the latest developments in street skating today. Written by a life-long skater who also happens to be an architectural historian and packed through with full-colour images of skaters, boards, moves, graphics, and film stills, this passionate, readable, and rigorously researched book explores the history of skateboarding and reveals a vivid understanding of how skateboarders through their actions experience the city and its architecture in a unique way. *Critique of Urbanization* Neil Brenner, 2016-12-05. Urbanization is transforming the planet within and beyond cities at all spatial scales. In this book, Neil Brenner mobilizes the tools of critical urban theory to deconstruct some of the dominant urban discourses of our time which naturalize and thus depoliticize the enclosures, exclusions, injustices, and irrationalities of neoliberal urbanism. In so doing, Brenner advocates a constant reinvention of the framing categories, methods, and assumptions of critical urban theory in relation to the rapidly mutating geographies of capitalist urbanization. Only a theory that is dynamic, which is constantly being transformed in relation to the restlessly evolving social worlds and territorial landscapes it aspires to grasp, can be a genuinely critical theory.
