Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self-appointed judge declaring winners and losers among America's colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short-term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best

college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Medical Schools 3E Josh Fischman,2006 **Alternative Pathways to the Baccalaureate** Nancy Remington,Ronald Remington,2023-07-03 This book does an excellent job of tracing the history of the movement and where it stands today It discusses the political context when these discussions happen in states and the education implications when institutions take on this additional mission This book may or may not convert those who are concerned about mission creep of community colleges but it sure will give them something to think about Clearly we cannot continue to do business as we have always done and expect to meet the growing demand for college educated citizens This book provides some thoughts on how to create a new model going forward and it deserves serious consideration from the Foreword by Carol D AmicoThe premise of this book is that in a globalized economy dependent on innovation and knowledge higher education must provide greater

more affordable access to the acquisition of higher level skills and knowledge for a greater proportion of the population The purpose of this book is to open up a debate about the status quo Should four year institutions remain the near exclusive conferrers of the baccalaureate Or is there a legitimate role for community colleges who already educate over half the undergraduate population of the United States at lower cost with few barriers to access The contributors examine the capacities of four year colleges to deliver training for technical occupations the ability of community colleges to deliver rigorous high quality courses and issues of access affordability faculty development and responsiveness to changing needs A chapter devoted to student voices provides the critical perspective of this constituency The book concludes by describing examples of implementation across the United States reviewing different models of articulation as well as promising practices that include eliminating the need for transfer altogether Alternative Pathways to the Baccalaureate provides vital information and new research for policymakers community college leaders and scholars of higher education to provoke much needed debate Published in association with the Community College Baccalaureate Association
