funding and leadership A core research agenda is outlined for these areas processors and multiple processor systems data communications and networking software engineering information storage and retrieval reliability and user interfaces This highly readable volume examines Computer science and engineering as a discipline how computer scientists and engineers are pushing back the frontiers of their field How CS E must change to meet the challenges of the future The influence of strategic investment by federal agencies in CS E research Recent structural changes that affect the interaction of academic CS E and the business environment Specific examples of interdisciplinary and applications research in four areas earth sciences and the environment computational biology commercial computing and the long term goal of a national electronic library The volume provides a detailed look at undergraduate CS E education highlighting the limitations of four year programs and discusses the emerging importance of a master s degree in CS E and the prospects for broadening the scope of the Ph D It also includes a brief look at continuing education

Overblown John E. Mueller,2006 Why have there been no terrorist attacks in the United States since 9 11 It is ridiculously easy for a single person with a bomb filled backpack or a single explosives laden automobile to launch an attack So why hasn t it happened The answer is surely not the Department of Homeland Security which cannot stop terrorists from entering the country legally or otherwise It is surely not the Iraq war which has stoked the hatred of Muslim extremists around the world and wasted many thousands of lives Terrorist attacks have been regular events for many years usually killing handfuls of people occasionally more than that Is it possible that there is a simple explanation for the peaceful American home front Is it possible that there are no al Qaeda terrorists here Is it possible that the war on terror has been a radical overreaction to a rare event Consider 80 000 Arab and Muslim immigrants have been subjected to fingerprinting and registration and more than 5 000 foreign nationals have been imprisoned yet there has not been a single conviction for a terrorist crime in America A handful of plots some deadly some intercepted have plagued Europe and elsewhere and even so the death toll has been modest Much probably most of the money and effort expended on counterterrorism since 2001 and before for that matter has been wasted The terrorism industry and its allies in the White House and Congress have preyed on our fears and caused enormous damage It is time to rethink the entire enterprise and spend much smaller amounts on only those things that do matter intelligence law enforcement and disruption of radical groups overseas Above all it is time to stop playing into the terrorists hands by fear mongering and helping spread terror its
