

The Vauxhall Frontiers was introduced into the UK at the end of 1989. At its launch, the Frontiers range consisted of a 2.0 litre (1000 cc) petrol engine 3-door model, and a 2.0 litre (2415 cc) petrol engine or 2.3 litre (2000 cc) diesel engine 5-door model. The engines are all self-proving units which have succeeded in many Vauxhall vehicles. All engines are of four-cylinder overhead camshaft design, mounted at the front of the car with the transmission mounted in line.

All models have fully-independent front suspension incorporating upper and lower arms, shock absorbers with torsion bars and were originally fitted with a leaf spring rear axle.

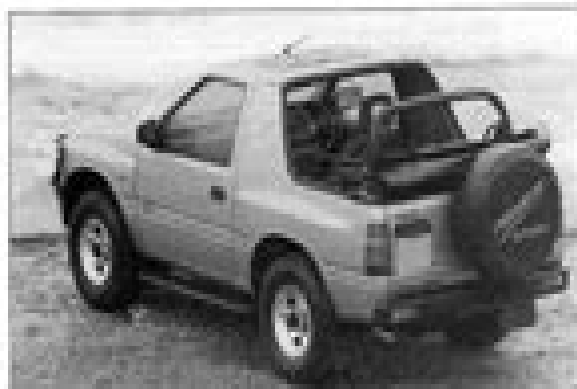

A wide range of standard and optional equipment is available within the range to suit most tastes, including central locking, electric windows and air electric sunroof. An air conditioning system was available as an option on certain models.

In early 1990 a soft-top 3-door model was introduced and in early 1991 the model range was completely revised. A new 2.0 litre (2416 cc) 16-valve petrol engine was brought in to replace the 2.0 litre engine and the 2.3 litre (2000 cc) diesel engine was replaced with a new 2.0 litre (2111 cc) engine. At the same time, the body underwent a major overhaul and the leaf spring rear axle was replaced with a new coil spring rear axle arrangement to improve road-holding and handling. The only other change to the Frontiers models range was the introduction of a new 2.0 litre (2416 cc) diesel engine in the middle of 1991.

Provided that regular servicing is carried out in accordance with the manufacturer's recommendations, the vehicle should prove reliable and very economical. The engine compartment is well-designed and most of the items requiring frequent attention are easily accessible.

Your Vauxhall Frontiers manual

The aim of this manual is to help you get the best value from your vehicle. It can do so in several ways. It can help you decide what work must be done (even though you choose to get it done for a garage). It will also provide information on routine maintenance and servicing, and give a logical course of action and diagnosis when certain faults occur. However, it is hoped that you will use the manual by leaving the work unstarted. On similar jobs it may even be sufficient for looking the vehicle into a garage and getting them fixed, to learn and collect it. Perhaps

most important, a lot of money can be saved by avoiding the costly garage-man charge to come to place and overhauls.

The manual has drawings and descriptions to show the location of the various components so that their location can be understood. Terms are described and photographed in a clear step-by-step sequence.

References to left and right of the vehicle are in the centre of a person in the driver's seat facing forwards.

- Prolonged contact with used engine oil can cause skin cancer. Wear gloves, or use a barrier cream if necessary. Change oil at a regular service and do not keep old oil in your garage.

The acid changes into a coloured or sticky substance covering the acid. Once formed the acid remains dangerous for years. If it gets onto the skin, it may be necessary to amputate the limb concerned.
- When dealing with a vehicle which has suffered a fire, or with components salvaged from such a vehicle, wear protective gloves and wash them after use.
