NEP-2020: Conception of a modern Knowledge Society RAJ SHREE DHAR,2023-07-01 The education system must be abreast of the latest technological developments and marvels Education institutions are the places and spaces where the consumption and production of knowledge benefits humanity by focusing on the most pressing problems of the planet Sri Aurobindo had very aptly declared that the teacher is a helper and a guide whose business is to suggest and not to impose Just as all biological and social systems continually evolve higher education institutions must also learn to evolve by reflecting on how best they can help solve the world s most challenging problems and by serving as places for life long and life wide learning Much of the nation s future depends on its system of education Humans are the only mammals to have fully opposable thumbs and this feature allows them to climb grasp and throw objects develop and manipulate tools and work with fine motor skills as well as allowing for advanced communication like writing As a result not only have humans become the most dominant species on the planet but they have also become by far its most intelligent imaginative adaptable and resourceful specie The change towards a sustainability mindset is important because humanity is facing unparalleled challenges brought about by human induced actions and also because humans have only one planet to call home Humans must rethink their relationship to the planet and to each other Human solidarity lies in the fact that we are part of the same human race and as such we must learn to work together for the welfare of our planet and the survival of our species A significant impact of the pandemic on higher education is the way it shifted the view of the role of socio emotional learning The psychological toll the pandemic took on young people especially due to isolation dislocation and the death and illness of loved ones has heightened the awareness around the importance of psychosocial care For many years the higher education community has recognized the importance of the so called soft skills that underpin employability such as creativity grit problem solving and empathy Such skills also help students to live gratifying personal lives and enhance their overall mental health and emotional resilience so we must not make the mistake of appreciating these skills as mere tools for securing and keeping jobs The present book is a collection of my articles published over the last couple of years with the aim to disseminate the necessary knowledge in bringing about relevant

changes in our education system Lastly this book would be failing in its purpose if I don't express the debt I owe to my parents Mrs Raj Mohini Dhar and Late Mr Triloki Nath Dhar who instilled in me the interest and the zest to pursue writing and always offered me their immensely valuable observations on knowledge education life cosmos and other fascinating matters Special thanks are due to Apoorva and Aayushree for their continued expression of love support and inspiration

Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies
