The Routledge Research Companion to Electronic Music: Reaching out with Technology Simon Emmerson, 2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music

**Aboriginal Art and Australian Society** Laura Fisher,2016-05-30 This book is an investigation of the way the Aboriginal art phenomenon has been entangled with Australian society s negotiation of Indigenous people s status within the nation Through critical reflection on Aboriginal art s idiosyncrasies as a fine arts movement its vexed relationship with money and its mediation of the politics of identity and recognition this study illuminates the mutability of Aboriginal art s meanings in different settings It reveals that this mutability is a consequence of the fact that a range of governmental activist and civil society projects have appropriated the art s vitality and metonymic power in national public culture and that Aboriginal art is as much a phenomenon of visual and commercial culture as it is an art movement Throughout these examinations Fisher traces the utopian and dystopian currents of thought that have crystallised around the Aboriginal art movement and which manifest the ethical conundrums that underpin the settler state condition
