Photographs and the Practice of History Elizabeth Edwards, 2021-12-16 What is it to practice history in an age in which photographs exist? What is the impact of photographs on the core historiographical practices which define the discipline and shape its enquiry and methods? In *Photographs and the Practice of History* Elizabeth Edwards proposes a new approach to historical thinking which explores these questions and redefines the practices at the heart of this discipline. Structured around key concepts in historical methodology which are recognisable to all undergraduates, the book shows that from the mid 19th century onward photographs have influenced historical enquiry. Exposure to these mass

distributed cultural artefacts is enough to change our historical frameworks even when research is textually based Conceptualised as a series of sensibilities rather than a methodology as such it is intended as a companion to how to approaches to visual research and visual sources Photographs and the Practice of History not only builds on existing literature by leading scholars it also offers a highly original approach to historiographical thinking that gives readers a foundation on which to build their own historical practices
