Gänzle,S.

Grimm,D. Makhan,2012-04-17 An assessment of the capacity of the EU to coordinate actors and policies with regards to global development The authors argue that the EU and its member states have the potential to act for global development when they are able to improve policy and actor coherence such as through better linking of bilateral and community programmes

Linkages Between Land Management, Land Degradation, and Poverty in Sub-Saharan Africa Nkonya, Ephraim,Pender, John,Kaizzi, Kayuki C.,Kato, Edward,Mugarura, Samuel,Ssali, Henry,Muwonge, James,2008-01-01 Most African countries strive for both poverty reduction and sustainable land management yet information on the exact

relationship between these goals is limited This report seeks to fill the gap by demonstrating a strong linkage between poverty and land management Using Uganda as a case study the authors show that certain policies such as investments in soil and water conservation and agroforestry may simultaneously increase productivity and reduce poverty and land degradation Other strategies including development of rural roads non farm activities and rural finance may reduce poverty without significantly affecting productivity or land management Some policies however will likely involve trade offs among different goals and will need to have their negative impacts minimized Those in government NGOs the private sector or academia who are concerned about sustainably reducing poverty in Sub Saharan Africa will benefit from this analysis of how to pursue these key development goals

Sustainable Macroeconomics, Climate Risks and Energy Transitions

Unurjargal Nyambuu,Willi Semmler,2023-05-30 Given the industrialized world s historical dependence on fossil fuel based energy resources and the now realized perils of moving beyond the earth s carbon budget this book explores the myriad challenges of climate change and in reaching a low carbon economy Reconciling the medium term competing yet frequently complementary needs for transition policies the book provides guidelines for complex and often conflicting climate policy tasks The book presents empirical trends in the use of carbon emitting resources and evaluates market driven short termism and its adverse impact on resource use and the environment it emphasizes a medium term macroeconomic perspective for the transition The authors attempt a paradigm shift towards a framework of sustainable macroeconomics They survey relevant historical models conduct empirical and numerical analyses of the climate change relevant dynamic models provide empirical illustrations and evaluate diverse policy options and implementations together with their historical evolution New analytical issues are also considered e g strategic behavior in the energy and resource sectors energy competition and the dynamics of market shares in new energy technology and supporting policies for dealing with the tipping points encountered in climate change The authors suggest a multitude of market based strategies and public fiscal monetary and financial policies and longer run planning for resource extraction all suitable for driving sustainable growth and a transformation of the energy sector The book also examines the multiple delaying forces slowing the transition to a low carbon economy these typically arise from short termism lock ins irreversibility leakages non cooperative games and other political strategies Thus they explain the snail s pace evolution of current national and global climate policies The book will appeal to scholars and students of economics and environmental science It is also relevant for policymakers and practitioners in multilateral institutions research institutions as well as governments and ministries of countries interested in alternative energy sources climate economists and those who study the implementation of sustainable and low carbon based policies

Water for Life
James L. Wescoat, Jr,Gilbert F. White,2003-10-16 Successful water management is crucial for the proper operation of natural environmental systems and for the support of human society These two aspects are interdependent but decisions about one are often made without regard to effects upon the other A persistent challenge is to consider them together This book fully

analyzes the relationship between water management environmental conditions and public policy It combines a careful review of the character and evolution of water management and evaluates management from the standpoint of the quality of the natural environment Topics covered include domestic and industrial water supply and waste disposal groundwater use river channel and floodplain management and integrated river basins The processes of social decision making are examined against a backdrop of plant soil water ecosystem relationships and ecosystem change Examples are drawn from around the world from local watershed management to international river basin planning with emphasis on integrative approaches
