Burkhardt, 2019-01-14 This work analyzes the role of private equity firms SCIs in forming strategic alliances in the French private equity market The subject is important because the formation of alliances and more generally the networking of SMEs could be an alternative to the lack of medium sized companies in France For French SCIs which are increasingly in a competitive situation assistance in forming alliances for their holdings may represent a new activity and be a source of competitive advantage The work is positioned transversally touching the areas of corporate governance entrepreneurial finance and strategy *Linguistic Analysis and Phenomenology* Wolfe Mays, Stuart C. Anonymous Sounds Nessa Johnston, Jamie Sexton, Elodie A. Roy, 2025-01-09 This cross disciplinary collection provides the first comprehensive study of library music practices in the 1960s and 1970s Library music was inexpensive off the shelf music available to license for a small fee It was widely used in television and film as a cheaper alternative to commissioned soundtracks The book pays attention to the different individuals groups organisations and institutions involved in making library music as well as to its transnational sites of production from continental recording studios to regional cutting rooms It addresses questions of distributed creativity collective authorship and agency Combining empirical and theoretical research

the book unveils the modus operandi of a highly secretive yet enduringly significant cultural industry By drawing attention to the cultural ubiquity and intersectionality of library music the collection also shifts emphasis from individual film and TV composers to the invisible community of music publishers writers and session musicians It argues that the latter were collectively responsible for fashioning much of the sonic identity of 1960s and 1970s film and television As well as providing a nuanced understanding of historical library music cultures the collection shows how they continue to inform contemporary audiovisual cultures

The Cambridge Companion to the Sophists Joshua Billings,Christopher Moore,2023-10-19 The Classical Greek sophists Protagoras Gorgias Prodicus Hippias and Antiphon among others are some of the most important figures in the flourishing of linguistic historical and philosophical reflection at the time of Socrates They are also some of the most controversial what makes the sophists distinctive and what they contributed to fifth century intellectual culture has been hotly debated since the time of Plato They have often been derided as reactionaries relativists or cynically superficial thinkers or as mere opportunists making money from wealthy democrats eager for public repute This volume takes a fresh perspective on the sophists who really counted as one how distinctive they were and what kind of sense later thinkers made of them In three sections contributors address the sophists predecessors and historical and professional context their major intellectual themes including language ethics society and religion and their reception from the fourth century BCE to modernity

Authentication in Insecure Environments Sebastian Pape,2014-09-02 Sebastian Pape discusses two different scenarios for authentication On the one hand users cannot trust their devices and nevertheless want to be able to do secure authentication On the other hand users may not want to be tracked while their service provider does not want them to share their credentials Many users may not be able to determine whether their device is trustworthy i e it might contain malware One solution is to use visual cryptography for authentication The author generalizes this concept to human decipherable encryption schemes and establishes a relationship to CAPTCHAS He proposes a new security model and presents the first visual encryption scheme which makes use of noise to complicate the adversary's task To prevent service providers from keeping their users under surveillance anonymous credentials may be used However sometimes it is desirable to prevent the users from sharing their credentials The author compares existing approaches based on non transferable anonymous credentials and proposes an approach which combines biometrics and smartcards

A Bride Without a Blessing David Brodsky,2006 David Brodsky uses form and source criticism to date Massekhet Kallah and the first two chapters of Kallah Rabbati which form a commentary on Massekhet Kallah to the mid amoraic period circa late third and early fifth centuries CE respectively and to

locate their redaction in Babylonia This makes these two sources the only known rabbinic texts whose final redaction took place in Babylonia during the amoraic period and establishes them as the closest extant relatives of the Babylonian Talmud Parallels between these two sources and the Babylonian Talmud elucidate the nature of oral transmission and of the redactional processes of Babylonian rabbinic material during this critical period and thereby of the Babylonian Talmud itself In addition the author deciphers Massekhet Kallah s peculiar asceticism a concern with men s inappropriate use of or interactions with their wives charity vows and even with the group s own transmitted traditions Massekhet Kallah fears the physical and at times cosmic effects of such inappropriate behavior Brodsky finds that these items were all deemed consecrated removed from the realm of normal interaction To have mundane interaction with them was a powerful and dangerous act Brodsky explores the fascinating gender and theological implications of this unique asceticism Summary of World Broadcasts British Broadcasting Corporation.
