

Teacher Guide: Weather Maps

Learning Objectives

Students will ...

- Interpret a weather station symbol.
- Measure the air pressure in high- and low-pressure systems.
- Draw the circulation of air around high- and low-pressure systems.
- Describe typical weather patterns associated with high- and low-pressure systems.
- Compare and contrast cold fronts and warm fronts.
- Explain how the weather might change as a cold or warm front passes through.

Vocabulary

air mass, air pressure, cold front, high-pressure system, knot, low-pressure system, precipitation, warm front

Lesson Overview

Nearly everyone has listened to a weather person forecasting tomorrow's weather. And nearly everyone has grumbled when that forecast turned out to be wrong. What goes into a weather forecast?

With the *Weather Maps Gizmo™*, students will gather meteorological data and observe typical weather patterns that are associated with high-pressure systems, low-pressure systems, cold fronts, and warm fronts. Based on the patterns they see, students will be able to predict what the weather will be like as one of these systems passes through.

The Student Exploration sheet contains three activities:

- Activity A – Students observe and describe high-pressure systems.
- Activity B – Students observe and describe low-pressure systems.
- Activity C – Students investigate cold fronts and warm fronts.

Suggested Lesson Sequence

1. Pre-Gizmo activity

(variable)

In the weeks leading up to your weather unit, take the class outside on days when particular weather systems are present. Have students observe the weather when a high-pressure system is present and when a low-pressure system is present. If possible, try to make observations as a cold front and a warm front pass through. Summarize each set of observations on butcher paper and post them on the wall of your classroom.

When students begin the *Weather Maps Gizmo*, you can refer to these observations to see how well they agree with what is shown in the Gizmo.
