Implementing SAP® CRM Vivek Kale, 2014-12-03

In today's competitive business environment most companies realize that the better they can manage their customer relationships the more successful they will become Customer Relationship Management CRM software systems are key tools for companies to manage the customer facing processes of their businesses However many companies have resisted implementing this most critical customer oriented application due in large part to the lack of a single point resource on implementing a CRM system This book attempts to fill that gap

Implementing SAP CRM will help technologists and managers come to grips with the vision concept and technology of CRM It begins by laying out the groundwork for understanding CRM It explains the concept and context of CRM and the tangible business benefits of CRM adoption Demonstrating a professional approach to the evaluation and selection of SAP it details the critical success factors CSFs patterns and anti patterns of a successful SAP CRM implementation CRM implementations can add significant benefit to the company's bottom line only if the company first transforms itself into a customer centric and customer responsive enterprise This book explains what it means to be a customer centric and responsive enterprise and provides a framework for business operations based on customer relationships rather than the traditional four Ps product positioning price promotion It further spells out business process reengineering BPR strategies to configure internal business processes and operations with SAP CRM to improve customer facing strategies services and relationships

IBM Software for SAP Solutions Yaro Dunchych, Peter Bahrs, Khirallah Birkler, Bernd Eberhardt, Navneet Goyal, James Hunter, Derek Jennings, Joe Kaczmarek, Michel Laaroussi, Michael Love, Stefan Momma, Nick Norris, Martin Oberhofer, Manfred Oevers, Paul Pacholski, Andrew Stalnecker, Jörg Stolzenberg, Pierre Valiquette, IBM Redbooks, 2015-09-29

SAP is a market leader in enterprise business application software SAP solutions provide a rich set of composable application modules and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite In most cases companies that adopt SAP software remain heterogeneous enterprises running both SAP and non SAP systems to support their business processes Regardless of the specific scenario in heterogeneous enterprises most SAP implementations must be integrated with a variety of non SAP enterprise systems

Portals Messaging infrastructure Business process management BPM tools Enterprise Content Management ECM methods and tools Business analytics BA and business intelligence BI technologies Security Systems of record Systems of engagement

The tooling included with SAP software addresses many needs for creating SAP centric environments However the classic approach to implementing SAP functionality generally leaves the business with a rigid solution that is difficult and expensive to change and enhance When SAP software is used in a large

heterogeneous enterprise environment SAP clients face the dilemma of selecting the correct set of tools and platforms to implement SAP functionality and to integrate the SAP solutions with non SAP systems This IBM Redbooks publication explains the value of integrating IBM software with SAP solutions It describes how to enhance and extend pre built capabilities in SAP software with best in class IBM enterprise software enabling clients to maximize return on investment ROI in their SAP investment and achieve a balanced enterprise architecture approach This book describes IBM Reference Architecture for SAP a prescriptive blueprint for using IBM software in SAP solutions The reference architecture is focused on defining the use of IBM software with SAP and is not intended to address the internal aspects of SAP components The chapters of this book provide a specific reference architecture for many of the architectural domains that are each important for a large enterprise to establish common strategy efficiency and balance The majority of the most important architectural domain topics such as integration process optimization master data management mobile access Enterprise Content Management business intelligence DevOps security systems monitoring and so on are covered in the book However there are several other architectural domains which are not included in the book This is not to imply that these other architectural domains are not important or are less important or that IBM does not offer a solution to address them It is only reflective of time constraints available resources and the complexity of assembling a book on an extremely broad topic Although more content could have been added the authors feel confident that the scope of architectural material that has been included should provide organizations with a fantastic head start in defining their own enterprise reference architecture for many of the important architectural domains and it is hoped that this book provides great value to those reading it This IBM Redbooks publication is targeted to the following audiences Client decision makers and solution architects leading enterprise transformation projects and wanting to gain further insight so that they can benefit from the integration of IBM software in large scale SAP projects IT architects and consultants integrating IBM technology with SAP solutions

SAP ABAP Objects Rehan Zaidi, 2019-09-27

Understand ABAP objects, the object oriented extension of the SAP language ABAP in the latest release of SAP NetWeaver 7.5 and its newest advancements. This book begins with the programming of objects in general and the basics of the ABAP language that a developer needs to know to get started. The most important topics needed to perform daily support jobs and ensure successful projects are covered. ABAP is a vast community with developers working in a variety of functional areas. You will be able to apply the concepts in this book to your area. SAP ABAP Objects is goal directed rather than a collection of theoretical topics. It doesn't just touch on the surface of ABAP objects but goes in depth from building the basic foundation e.g. classes and objects created locally and globally to the intermediary areas e.g. ALV programming, method chaining, polymorphism, simple and nested interfaces and then finally into the advanced topics e.g. shared memory, persistent objects. You will know how to use best practices to make better programs via ABAP objects. What You Will Learn: Know the latest advancements in ABAP objects with the new SAP Netweaver system; Understand object oriented ABAP classes and their components; Use object creation and instance methods calls; Be familiar with the functions of the global class builder; Be exposed to advanced topics; Incorporate best practices for making object oriented ABAP programs. Who This Book Is For: ABAP developers. ABAP

programming analysts and junior ABAP developers Included are ABAP developers for all modules of SAP both new learners and developers with some experience or little programming experience in general students studying ABAP at the college university level senior non ABAP programmers with considerable experience who are willing to switch to SAP ABAP and any functional consultants who want or have recently switched to ABAP technical
