The book presents 39 revised full papers and 57 revised short papers together with 4 invited talks addressing subjects from theoretical and methodological issues to applications. Topics include agent models, agent architectures, agent oriented software engineering, semantic Web, service collaboration, coordination and negotiation and more. **Content Management Systems** Nelson Oly Ndubisi, 2006 Libraries have only just begun to realize that their web presence is potentially as rich and complex as their online catalogs and that it needs an equal amount of management to keep it under control. Content management systems covers a range of topics from implementation to interoperability, object oriented database management systems and research about meeting user needs. *Content Management Systems for Libraries* Bradford Lee Eden, 2008-06-06 Content Management Systems in Libraries Case Studies brings together a number of case studies on current content management system CMS implementations using both open source and proprietary systems and also reflects on the current state and future of CMS in libraries. There is presently no one source or research guide for CMS given that this area is in flux yet this type of book is needed in the literature as many libraries are just starting to implement CMS for their website, instructional content or other institutional repository settings. Book jacket **Official Gazette of the United States Patent and Trademark Office** United States. Patent and Trademark Office, 2002 **The Adaptive Web** Peter Brusilovski, Alfred Kobsa, Wolfgang Nejdl, 2007-04-24 This state of the art survey provides a systematic overview of the ideas and techniques of the adaptive Web and serves as a central source of information for researchers, practitioners and students.
