Abstract

This IBM Redbook® publication provides information about the concepts, planning, and design of IBM WebSphere® Application Server V8 environments. The target audience of the book is IT architects and consultants who want more information about the planning and designing of application-serving environments, from small to large, and complex implementations.

This book addresses the packaging and features in WebSphere Application Server V8 and highlights the most common implementation strategies. It provides information about planning for specific tools and components that conform to the WebSphere Application Server environment.

Also in the book are planning guidelines for WebSphere Application Server V8 and WebSphere Application Server Network Deployment® V8 on distributed platforms and for WebSphere Application Server for z/OS® V8. This book contains information about migration considerations when moving from previous releases.

Melnyk,Jessica Rockwood,IBM Redbooks,2014-01-08 Building on the business intelligence BI framework and capabilities that are outlined in InfoSphere Warehouse A Robust Infrastructure for Business Intelligence SG24 7813 this IBM

Redbooks publication focuses on the new business insight challenges that have arisen in the last few years and the new technologies in IBM DB2 10 for Linux UNIX and Windows that provide powerful analytic capabilities to meet those challenges. This book is organized in two parts. The first part provides an overview of data warehouse infrastructure and DB2 Warehouse and outlines the planning and design process for building your data warehouse. The second part covers the major technologies that are available in DB2 10 for Linux UNIX and Windows. We focus on functions that help you get the most value and performance from your data warehouse. These technologies include database partitioning, intrapartition parallelism, compression, multidimensional clustering, range table partitioning, data movement utilities, database monitoring interfaces, infrastructures for high availability, DB2 workload management, data mining, and relational OLAP capabilities. A chapter on BLU Acceleration gives you all of the details about this exciting DB2 10.5 innovation that simplifies and speeds up reporting and analytics. Easy to set up and self-optimizing BLU Acceleration eliminates the need for indexes, aggregates, or time-consuming database tuning to achieve top performance and storage efficiency. No SQL or schema changes are required to take advantage of this breakthrough technology. This book is primarily intended for use by IBM employees, IBM clients, and IBM Business Partners.
