Teaching Psychology

and the Socratic Method James J. Dillon, 2016-11-18 This book presents a lively and accessible way to use the ancient figure of Socrates to teach modern psychology that avoids the didactic lecture and sterile textbook. In the online age, is a living teacher even needed? What can college students learn face to face from a teacher they cannot learn anywhere else? The answer is what most teachers already seek to do: help students think critically, clearly define concepts, logically reason from premises to conclusions, engage in thoughtful and persuasive communication, and actively engage the franchise of democratic citizenship. But achieving these outcomes requires an intimate interpersonal learning community. This book presents a plan for using the ancient figure of Socrates and his Method to realize humane learning outcomes in the context of psychology.

The Johns Hopkins Guide to Psychological First Aid George S. Everly Jr., Jeffrey M. Lating, 2022-08-02 Learn the essential skills of psychological first aid from the experts, the creators of the Johns Hopkins RAPID PFA method. Psychological first aid or PFA is designed to mitigate the effects of acute stress and trauma and assist those in crisis to cope effectively. PFA can be applied in emergencies including disasters, terrorist attacks, and the COVID-19 pandemic. In the second edition of this essential guide, George S. Everly Jr. and Jeffrey M. Lating draw on their experiences in Kuwait after the Gulf War, in New York City after the September 11 attacks, and during the COVID-19 pandemic to describe the principles and practices of PFA in an easy-to-follow prescriptive and practical manner. Informed by current events, the second edition includes updated chapters as well as three completely new chapters on cultural awareness, PFA considerations with children, the use of PFA to facilitate community mental health and resilience. Aimed at mental health practitioners, first responders, and global health disaster teams such as Médecins Sans Frontières and the World Health Organization, but also beneficial to those with little or no previous mental health training, *The Johns Hopkins Guide to Psychological First Aid* thoroughly explains the RAPID PFA model, a unique evidence-informed and evidence-based PFA method. It follows a set of easily understood principles. In each chapter, Everly and Lating, who have traveled nationally and internationally to teach the RAPID PFA model in numerous public health, fire, police, military, business, and faith-based settings, provide a step-by-step approach and include a key point summary. A unifying case exemplifies each phase of the RAPID PFA model in an ongoing dialogue that presents ideal PFA responses, examples of common mistakes, and various outcomes.

The SAGE Encyclopedia of Intellectual and Developmental Disorders Ellen Braaten, 2018-01-29 According to the CDC, about one in six or about 15% of children aged 3 through 17 years have one or more developmental disabilities such as ADHD, autism spectrum disorders, cerebral palsy, intellectual disability, and learning disability. Intellectual disorders are characterized by significant limitations in both intellectual functioning and in adaptive behavior, which covers many everyday social and practical skills, impacting learning, reasoning, problem solving, and other cognitive processes. These disabilities originate before the age of 18 and continue across the life span. Developmental disorders are chronic disabilities that can be cognitive or physical or both. The disabilities appear before the age of 22 and are likely to progress across the lifespan. Some developmental disorders are largely physical issues such as

cerebral palsy or epilepsy Some individuals may have a disorder that includes a physical and intellectual disability for example Down syndrome or fetal alcohol syndrome Intellectual and developmental disorders are significant and growing issues that are studied across a number of disciplines The SAGE Encyclopedia of Intellectual and Developmental Disorders is aimed at students interested in psychology counseling education social work psychiatry health sciences and more This encyclopedia will provide an in depth look at a wide range of disorders alongside interventions the latest research translated for an undergraduate audience historical context and assessment tools for higher level students We will take a truly interdisciplinary approach by also covering sociocultural viewpoints policy implications educational applications ethical issues and more

His book *Big Data and Hadoop* was released by a past president of the Institution of Electronics and Telecommunication Engineers. Books already written on Big data analytics, Data Science and Machine learning are already approved by AICTE. Accounting Education Seedwell Tanaka Muyako Sithole, Indra Abeysekera, 2017-02-24. This book provides a comprehensive and critical overview of learning accounting. It illustrates that when learners need to mentally integrate two or more distinct items of information, it places unnecessary demands on cognitive load. The book discusses the cognitive load theory which assumes that the task of mental integration increases the load on already limited working memory and it does so to such an extent that learning may be severely impeded. The book also investigates how students could deal with cognitive overload when learning introductory accounting using three instructional design formats: the split attention format, the integrated format, and the self-managed format. **The Method of Multiple Hypotheses** Charles S.

Reichardt, 2021-10-20. This book illustrates the method of multiple hypotheses with detailed examples and describes the limitations facing all methods, including the method of multiple hypotheses, as the means for constructing knowledge about nature. Author Charles Reichardt explains the method of multiple hypotheses using a range of real-world applications involving the causes of crime, traffic fatalities, and home field advantage in sports. The book describes the benefits of utilizing multiple hypotheses and the inherent limitations within which all methods must operate because all conclusions about nature must remain tentative and forever subject to revision. Nonetheless, the book reveals how the method of multiple hypotheses can produce strong inferences even in the face of the inevitable uncertainties of knowledge. The author also explicates some of the most foundational ideas in philosophy of science, including the notions of the underdetermination of theory by data, the Duhem-Quine thesis, and the theory-ladenness of observation. This book will be important reading for advanced undergraduates, graduates, and professional researchers across the social, behavioral, and natural sciences wanting to understand this method and how to apply it to their field of interest. *Care and Compassion in Capitalism* Cagri

Yalkin, Mustafa F. Özbilgin, 2024-11-13. Addressing a gap in the examination of market-centric and individual-focused aspects of care, this volume brings together interdisciplinary insights from across the social sciences to enrich the debate in the field of business and management around the treatment of care, compassion, and capitalism. **General Psychology for Filipino**

College Students, 2007. **Bundle** Wayne Weiten, 2014. Handbook for Teaching Introductory Psychology Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01. Like its predecessors, Volume III of the *Handbook for Teaching Introductory Psychology* provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from *Teaching of Psychology TOP*, the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from *TOP* that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections: Section One, Issues and

Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology
