Promoting Rigor Through Higher Level Questioning Todd Stanley, 2021-09-09 Promoting Rigor Through Higher Level Questioning equips teachers with effective questioning strategies and **A Transition to Abstract Mathematics** Randall Maddox, 2008-10-13 Constructing concise and correct proofs is one of the most challenging aspects of learning to work with advanced mathematics Meeting this challenge is a defining moment for those considering a career in mathematics or related fields A Transition to Abstract Mathematics teaches readers to construct proofs and communicate with the precision

necessary for working with abstraction It is based on two premises composing clear and accurate mathematical arguments is critical in abstract mathematics and that this skill requires development and support Abstraction is the destination not the starting point Maddox methodically builds toward a thorough understanding of the proof process demonstrating and encouraging mathematical thinking along the way Skillful use of analogy clarifies abstract ideas Clearly presented methods of mathematical precision provide an understanding of the nature of mathematics and its defining structure After mastering the art of the proof process the reader may pursue two independent paths The latter parts are purposefully designed to rest on the foundation of the first and climb quickly into analysis or algebra Maddox addresses fundamental principles in these two areas so that readers can apply their mathematical thinking and writing skills to these new concepts From this exposure readers experience the beauty of the mathematical landscape and further develop their ability to work with abstract ideas Covers the full range of techniques used in proofs including contrapositive induction and proof by contradiction Explains identification of techniques and how they are applied in the specific problem Illustrates how to read written proofs with many step by step examples Includes 20% more exercises than the first edition that are integrated into the material instead of end of chapter
