The Kubler Ross Method:

Making Sense of Change Management Esther Cameron, Mike Green, 2004 Written for academics and professionals alike this book is an attempt to make change easier It is aimed at anyone who wants to understand why change happens how it happens and what needs to be done to make change a welcome rather than a dreaded concept **The Life Work of Dr. Elisabeth Kübler-Ross and Its Impact on the Death Awareness Movement** Michèle Catherine Gantois Chaban, 2000 Ontario based clinical thanatologist Chaban traces Kubler Ross influence on the field and health science education over the past quarter century She argues that her paradigms which have dominated care of the dying in North America's health care system may work in a general way to deal with most situations of loss but may not be effective and specific enough to care for the dying or the bereaved or to provide occupational support for professional caregivers Rather she contends thanatology must begin to distinguish itself within palliative or hospice care with specific clinical educational and research considerations The treatise seems to have been a doctoral dissertation for the University of Wales The text is double spaced The computer generated index is fairly useless Annotation copyrighted by Book News Inc Portland OR Theoretical Frameworks in Qualitative Research Vincent A. The Shadow Side of Fieldwork Athena McLean, Annette Leibling, 2008-04-15. *The Shadow Side of Fieldwork* draws attention to the typically hidden or unacknowledged aspects of ethnographic fieldwork encounters that nevertheless shape the resulting knowledge and texts. Addressing these invisible, elusive, unspoken, or mysterious elements introduces a distinctive rigor and responsibility to ethnographic research. Luminaries in anthropology dare to explore the unspeakable and invisible in the ethnographic encounter. Considers personal and professional challenges, ethical, epistemological, and political, faced by researchers who examine the subjectivities inherent in their ethnographic insights. Explores the value and limitations of addressing the personal in ethnographic research. Includes a critical discussion of the anthropologist's self in the field. Introduces

imaginative rigor to ethnographic research to heighten confidence in anthropological knowledge.

Disability Across the Developmental Life Span Julie Smart, 2011-11-14. This is the only text to provide comprehensive coverage of human growth and development, a requirement mandated by the Council of Rehabilitation Education (CORE) for a master's degree in rehabilitation counseling and for Licensed Professional Counselor certification. Written by an eminent leader in the field of disability studies, this book reflects a significant change in perceptions of individuals with disabilities from being defined foremost by their disability to being viewed as normal individuals with a disability. It provides an understanding of traditional human growth and development that will enhance the practice of disability counseling by enabling an understanding of a client's childhood and prior life experiences. The book begins with a focus on developmental theories and tasks, followed by a discussion of cultural and ethical considerations in human development. It considers the major theories of human development as they relate to people with and without disabilities and career theories with a focus on the concept of choice. The book addresses specific developmental stages, including a description of developmental tasks, risks, disability applications, specific disabilities common to a particular stage, and cultural and ethical issues, all supported by case examples.

Key Features:
