**The Osaro Theory** Efosa Osaro, 2019-07-11 The Osaro Theory suggests that there is a variation between those who evolved in tropical conditions and those who evolved in a colder climate It is the author s belief that these environmental differences have altered not only the physiology but are also responsible for the biological and the behavioral differences between blacks whites and Asians

The Emotional Reservoir is a phrase he coined based on the study of the enormous effect of the sun on the earth and how it affects human biology physiology and behavior According to his theory these environmental differences have numerous effects on human beings also on how the environment can dictate human intelligence This theory also suggests that the people who evolved out of sub Saharan Africa tend to possess more Emotional Reservoir than the Europeans and Asians who evolved in a colder environment and who tend to have a lesser Emotional Reservoir Furthermore this higher Emotional Reservoir is also responsible for certain behaviors that are detrimental to the growth and the stability of these groups which in turn cause behavioral pathologies and poor decision making World Geography' 2007 Ed. While emphasizing the technical aspects and practical applications of renewable sources, the text also covers the economic, social and policy implications of large scale implementation. The main focus of the book is on methods of obtaining energy from self replenishing natural processes while limiting pollution of the atmosphere, water and soil as this is a critical pathway for the future. Exploring the subject from a scientific perspective highlights the need for renewable energy and helps to evaluate the task at hand. The book is written for a wide range of readers including students of diverse backgrounds and individuals in the energy industries and presents the material in a user friendly manner. Even individuals can have an impact on the quest to develop renewable energy sources. The concepts and guidelines described provide critical scientific rationale for pursuing clean and efficient energy sources as well as the knowledge needed to understand the complex issues involved. Woven with real life situations, the text presents both the advantages and challenges of the different types of renewable energy.

**Homesick** Lyla Yastion, 2018-09-15 Human induced climate change is emerging as the most critical issue of the modern era Ninety seven percent of climate scientists now confirm that human extraction and burning of fossil fuels along with rampant deforestation is causing a rapid build up of carbon dioxide and other greenhouse gases in air and water These emissions heat up the planet and may be pushing Earth s capacity beyond the threshold at which equilibrium can be restored Global warming is sustained by a global capitalist economy dependent upon the fossil fuel industry and agribusiness both of which are unsustainable The toxic effects of air pollution ocean acidification and soil degradation are harming the health of all species Through an interdisciplinary approach that brings in the perspectives of the physical sciences psychology anthropology economics cultural history and spirituality Homesick investigates the evolutionary path by which human beings have arrived at this precarious juncture It proposes that this perilous detour in human cultural evolution arises from a fallacious belief that the human species unlike other species is not bound by ecological laws but has a special right to control and master the natural world Human beings suffer from the illusion that they are separate from the Earth their planetary home which is perceived as an object a commodity to exploit through technology They have forgotten what indigenous peoples still remember humanity is part of not apart from the natural world Homesick argues that cultural transformation towards a sustainable future is possible when human beings reawaken to Nature as partner and provider As memory of their embeddedness in the natural world is aroused they will experience love and respect for the interdependent web of life that sustains them This reawakening incrementally induces a radical change in thinking within society and sets in motion a paradigm shift Cultural institutions are then reshaped to match this new benign worldview
