This book gives you an overview of Designing and implementing a cost effective Automobile Theft Deterrent System ATDS. The design talks about merging a ublox GPS unit and a Wavecom GSM module which can be of good support to design a fleet management system as well. The main feature of the ATDS is to deactivate the vehicle when the unit receives a specific command from the authenticated mobile unit. The deactivation technique is based on interrupting the ground connection to the Power Distribution Centre PDC by providing an activation message from the users mobile unit. Once the PDC is disconnected the Auto ShutDown Relay ASD is latched this in return kills the engine and the complete electronic Control units ECUs present in the vehicle. Further the vehicle is tracked through GPS. The GPS data is written to the company database and transferred to the GIS to provide the user with the location on the map. The design talks about interfacing a MEMS sensor for speed detection. This book focuses on the creation of an interactive ATDS. The ATDS is designed using OpenAT OS. Standard for Automobile Theft Deterrent Equipment and Systems : Electronic Immobilization Standards Council of Canada, Underwriters' Laboratories of Canada,1998 **Car Theft Control System with Only 10 \$ Cost !** Mohamed Ibrahim,2019-09-11. Several vehicle manufactures are investing considerable funds in developing new anti theft systems. Which aim to reduce car stealing or to increase the time of stealing. Currently new technologies are available that can improve vehicle anti theft such as immobilizer. Conventional vehicle are not equipped with all known safety features that are available on the market because of their high price. Vehicle manufacture typically fit the latest safety features into their highest classes of vehicle. But over the time these element becoming almost routine feature of lower vehicle classes too. Research has indicated that the introduction of such technologies as standard on new vehicle would bring significant benefits for the vehicle owners these new security technologies are already invented.
