Abstracts are also included to provide with an account of the things people often experience the authors involved in their lives. The first two chapters provide another perspective about how people are experiencing themselves in the world.

For example, although other strategies are suggested to improve processes for teacher training and induction, all would have to be carefully tailored, based on fully and carefully defined teacher requirements. Some changes might be implemented with little or no resistance or limited opposition, while other efforts to professionalize might face barriers and require thoughtful engagement with those who oppose. Moreover, we anticipate it will be critical to support teachers and principals and participants in both teacher training opportunities and other professional development.
