Rodgers, Fernando

Galdon, Craig Bremner, 2024-04-16 The Covid 19 crisis and the designed interventions that the authors have catalogued in this book prove definitively that design does care The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive Then they looked at all of this care and caring from the point of view of design and by the sheer volume of design interventions they have documented illustrate that design is good in a crisis What the Covid 19 pandemic illustrated is that for the first time in modern history capital was totally irrelevant Money could not save your life Only design could Rapidly designed masks shelters hospitals instructional posters infographics dashboards respirators sanitisers virtual and local communities emerged to save us From January 2020 design became king The Covid 19 global pandemic presented an ontological reality design is more than margins or profit In fact design became extremely valuable when it stopped concentrating on those things and started to care about peoples lives This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care The contents of this book cover the outbreak lockdown and the beginning of the reopening in the UK In between the book functions as a history of pandemic crisis design interventions As such it is a research in the moment project where we have illustrated our thoughts and insights in tables charts and diagrams We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format No curation No selection No position The task of critical analysis must follow perhaps by us certainly by others *Clinical practice guidelines for influenza* World Health Organization, 2024-09-12 The purpose of these updated clinical guidelines for influenza is to assist clinicians in the care of persons with suspected or confirmed influenza virus infection Recommendations include the management of both severe and non severe influenza and also the use of antiviral medications to prevent influenza virus infection in individuals exposed to the virus in the previous 48 hours This update applies to patients with seasonal influenza viruses pandemic influenza viruses and novel influenza A viruses known to cause severe illness in infected humans zoonotic influenza such as avian influenza A H5N1 A H5N6 and A
